7. 3pp Arch Lift

The 3pp(R) PF Lift(TM) relieves pain in the arch by lifting and supporting the arch. Thin enough to wear in dress shoes, slip-on shoes or even around the house just over socks. Soft, foam-lined strap will not slip or roll. Sewn-in arch support pad conforms to the foot. Adjustable straps let you control the amount of arch compression. Velcro closure. Additional metatarsal pad can be added to relieve ball-of-foot pain. Hand or machine wash and air dry. Latex-free. Indications: The 3pp(R) PF Lift(TM) is used in the treatment of arch pain, flatfeet, pronation, plantar fasciitis and posterior tibial tendon dysfunction.

Price: 23.95 USD

SKU: 948

Weight: 3.00 ounce(s)

Stock quantity: 0

8. 3pp Plantar Fasciitis Lift

The 3pp(R) PF Lift(TM) is a soft splint that relieves the pain of plantar fasciitis day and night with a gentle, controlled stretch. Non-slip foam-lined straps stay in place and apply adjustable force to lift and supinate the foot, relieving stress on the plantar fascia. Thin enough to wear in shoes and maintain stretch for long-term relief of foot, heel and arch pain. The plantar fasciitis splint is made of breathable nylon and spandex to minimize sweating. Hand or machine wash on gentle with Velcro engaged in a delicates bag. Lay flat to dry. Universal right/left. 1/pkg. To determine size measure circumference 4 inches above the ankle. Small/Medium fits 7 inches - 11 inches, 17.8 centimeters - 28 centimeters, Large/X-large fits 11 inches - 15 inches, 28 centimeters - 38 centimeters. Indications: The 3pp Plantar Fasciitis Lift is used in the treatment of arch pain, flatfeet, posterior tibial tendon dysfunction, heel pain and plantar fasciitis.

Price: 35.95 USD

SKU: 830

Weight: 4.00 ounce(s)

9. 3pp Toe Loops

3pp(R) Toe Loops(TM) use a unique approach to treating overlapping, crooked, broken and hammer toes. Cushioning and grip make 3pp Toe Loops ideal for re-positioning crooked and curved toes. A loop-and-wrap design acts as a toe splint, securing two or more toes together, securing broken toes and de-rotating toes that turn under. Use 3pp Toe Loops to cushion sore tops of toes and straighten toes. You can wear them while barefoot or with any footwear. Easy to apply. Hand-washable and latex-free. We suggest narrow for smaller toes and wide for the great toe. Universal right/left. 3/pkg. Narrow measures 1 inch wide and 3 inches long, Wide measures 1 1/2 inches wide and 4 inches long. Indications - 3pp(R) Toe Loops(TM) are used in the treatment of claw toes, mallet toes, hammer toes, broken toes, soft corns, arthritis of the toes and overlapping toes due to failed surgery.

Price: 17.95 USD

SKU: 864

Weight: 3.00 ounce(s)

10. Achilles Heel Pad

The Achilles Heel Pad has a soft gel pad inside soft stretchy fabric that protects the achilles tendon area and back of heel from friction while gently compressing and reducing pressure around sore areas. Washable and re-usable pads, each pad can be used over and over again. Thin design makes it ideal for use in all styles of footwear. Sizing: S/M: Women & Men L/XL: Men or Women. The main difference in the 2 sizes is mainly the length of the gel from top to bottom versus the diameter. Indications - The Achilles Heel Pad is used in the treatment of Achilles tendonitis, rehabilitation of Achilles tendon tears, calcaneal bursitis, heel pain, and Haglund's deformity (pump bump). Foot Care Tip - Heel position significantly affects Achilles tendonitis. Low-heeled shoes and going barefoot increase the mechanical load applied by calf muscles to the Achilles tendon. Be sure your treatment plan for Achilles tendonitis includes avoiding low-heeled shoes and going barefoot. A heel lift worn with the Achilles Heel Pad can cut your healing time in half. Also be sure to ice the Achilles tendon before and after exercise.

Price: 28.95 USD

SKU: 984

Weight: 3.00 ounce(s)

11. Achilles Tendon Support by Pro-Tec

The Pro-Tec Achilles Tendon Support uses a unique method to compress the Achilles tendon, easing chronic tendon pain. The neoprene strap, applied above the ankle, includes a firm but comfortable pressure pad applying focused compression to the Achilles tendon. The elastic strap wraps beneath the heel, providing a consistent heel lift. The Pro-Tec Achilles Tendon Support is made of UBL neoprene, felt, Cool Max Mesh, elastic and Velcro. Latex-free. Universal right/left. 1/pkg. Indications - The Pro-Tec Achilles Tendon Support is used in the treatment of Achilles tendonitis, rehabilitation of Achilles tendon tears, calcaneal bursitis, heel pain, plantar fasciitis, heel spur syndrome and Baxter's nerve entrapment. Foot Care Tip - Heel position significantly affects Achilles tendonitis. Low-heeled shoes and going barefoot increase the mechanical load applied by calf muscles to the Achilles tendon. Be sure your treatment plan for Achilles tendonitis includes avoiding low-heeled shoes and going barefoot. A heel lift worn with the Pro-Tec Achilles Tendon Support can cut your healing time in half. Also be sure to ice the Achilles tendon before and after exercise.

Price: 19.95 USD

SKU: 873

Weight: 4.00 ounce(s)

12. Adjust-a-Heel Lift

Adjust-a-Heel Lift is an adjustable lift used to treat heel pain and leg length differences. Use all three layers for 3/8" build-up, or peel of individual 1/8" layers for the desired thickness. The layers can be reattached at any time. Raising the heel weakens mechanical forces applied to the foot by the calf, easing plantar fasciitis pain and allowing the plantar fascia and Achilles tendon to heal. Use a heel lift with a calf-stretching program to treat plantar fasciitis pain and Achilles tendonitis. Camel colored faux leather cover over three layers of 1/8" sponge rubber, totalling 3/8". Universal right/left. One/pkg. Indications: The Adjust-a-Heel Lift is used in the treatment of plantar fasciitis, Achilles tendinitis, partial Achilles tendon rupture, heel spur, Sever's disease, retrocalcaneal bursitis and heel pain.

Price: 9.95 USD

SKU: 973

Weight: 4.00 ounce(s)

13. AirHeel By AirCast

The AirHeel by Aircast treats heel pain by applying pulsating compression with every step. The AirHeel features two interconnected air cells situated on the bottom and back of the heel. Fits most shoes. Made of lightweight neoprene fabric and simple to use. Just slip it on like a sock and adjust the fit with one strap. Latex-free. Small fits men's sizes up to 7, women's sizes up to 8.5 and Euro sizes up to 40, Medium fits men's sizes up to 11, women's sizes up to 12 and Euro sizes up to 44, Large fits men's sizes 11.5+, women's sizes 12.5+ and Euro sizes 45+. Indications - The AirHeel by Aircast is used in the treatment of plantar fasciitis, heel spur syndrome, Sever's disease, retrocalcaneal bursitis, Baxter's nerve entrapment and Achilles tendonitis.

14. Ankle Support - Elastic

The Ankle Support - Elastic provides stability and compression for weak, swollen ankles. Great treatment for an injured ankles including initial ankle sprain care and follow-up fracture care. The Elastic Ankle Support is also a great ankle brace for sports including basketball, soccer, volleyball and football. Designed to provide maximum support and flexibility for everyday activities. Open heel and toe design affords room in all shoes. Durable and washable knitted elastic. Latex-free. 1/pkg.

For sizing please measure the ankle circumference and use the following chart: Small for 6-8 inches, Medium for 8-10 inches, Large for 10-14 inches, X-large for 14-17 inches. Indications: The Elastic Ankle Support is used in the care and treatment of acute and chronic ankle sprains. The brace also may be used to control ankle swelling, ankle arthritis and mid-foot arthritis. The Elastic ankle Support is a great sports medicine brace for mild ankle instability and recurrent sprains. Foot Care Tip! When shopping for an ankle brace ask yourself this question: Am I looking for a brace that provides lateral ankle stability or compression for swelling? On a scale of 1-5 (1 poor/5 best) we rate the Elastic Ankle Support a '3' for control of ankle instability and '5' for ankle swelling. We primarily recommend the Elastic Ankle Support for active users who require a light-weight brace for walking, running and sports. This also is a great brace for rehab after ankle sprains and fractures. Be sure to check each of our other ankle supports for additional information.

Price: 9.95 USD

Weight: 5.00 ounce(s)

15. Ankle Wrap - Figure-8

The Figure-8 Ankle Wrap supports and compresses the ankle, providing stability and controlling ankle swelling and pain. Velcro closure allows flexible treatment for a sprained ankle, letting you wrap the ankle as tightly as you want to adjust compression as needed. Made of 3-inch-wide elastic. Wear with or without shoes for daily support. Hand wash. Latex-free. 1/pkg. Sizing may vary with swelling and width of the foot. For proper sizing please measure the circumference of the mid-foot and use the following sizing chart. Small for measurements of 8-9 inches, Medium for measurements of 9-10 inches, Large for measurements of 10-11 inches, X-large for measurements of 11-12 inches. Indications: The Figure-8 Ankle Wrap is used in the care and treatment of ankle sprains and following ankle fractures. This is a good brace to be worn after ankle surgery to control ankle swelling and pain. The Figure-8 Ankle Brace is a great sports ankle brace used for football, soccer, volleyball or running. Foot Care Tip! When shopping for an ankle brace ask yourself this question: Am I looking for a brace that provides lateral ankle stability or compression to control swelling? On a scale of 1-5 (1 poor/5 best) we rate the Figure-8 Ankle Wrap a '2' for control of ankle instability and '4' for control of ankle swelling. We primarily recommend The Figure-8 Ankle Wrap for those who are looking for a light-weight wrap that will fit into all shoes. The Figure-8 Ankle Wrap is a good choice for rehab after ankle sprains. Be sure to check each of our other ankle supports for additional information.

16. Antifungal Healing Foot Cream

Do you suffer from chronic dry, peeling feet? Chronic dry and peeling skin on the soles of the feet that does not respond to skin softeners typically is a symptom of a low-grade fungal infection called tinea rubrum. Natural Antifungal Healing Foot Cream soothes dry peeling skin and treats fungal infections of the foot with a therapeutic formula of tea tree oil and lavender oil. Antifungal Healing Cream absorbs quickly, delivering antibacterial and antifungal agents to prevent irritation, cracking and painful fissuring. Doctor-recommended for diabetics. Ingredients: Organic herbal infusion of chamomile, Echinacea, green tea and lavender, plant oils of safflower, jojoba, sesame, grape seed, and avocado, vegetable glycerin, organic aloe barbadensis, glyceryl stearate, isopropyl palmitate, stearic acid, cucumber extract, organic sea kelp extract, pro-vitamin B5, lecithin, silica, ethylhexylglycerin, phenoxyethanol, tocopheryl acetate Vitamin E, Lavender and Tea Tree Essential Oils. Indications: Natural Antifungal Healing Foot Cream is used in the treatment of athlete's foot, fungus infections of the nail, onychomycosis, dry skin, chronic peeling skin of the plantar foot and skin bacterial infections of the foot. Foot Care Tip! It's important to remember fungal infections aren't cured but managed and that means on-going treatment is required. The best way to do this is to get in the habit of using a topical antifungal once or twice daily depending on need. Keep feet cool, dry and open to the air when possible.

17. Antifungal Healing Foot Cream

Do you suffer from chronic dry, peeling feet? Chronic dry and peeling skin on the soles of the feet that does not respond to skin softeners typically is a symptom of a low-grade fungal infection called tinea rubrum (chronic athlete's foot). Antifungal Healing Foot is a natural alternative to pharmaceutical antifungal medications. Antifungal Healing Cream soothes dry peeling skin and treats fungal infections of the foot with a therapeutic formula of tea tree oil and lavender oil. The cream absorbs quickly, delivering antibacterial and antifungal agents to prevent irritation, cracking and painful fissuring. Our unique blend is easy on fragile skin and diabetic safe. No preservatives or fragrances. Indications: Antifungal Healing Foot Cream is used in the treatment of athlete's foot, dermatitis, dry skin, foot odor, fungal infections of the nail, injuries of the nail including runner's nail, hyperhydrosis, onychomycosis, sweaty feet and toe box dermatitis. Additional indications include jock itch, diaper rash and fungal infections in skin folds such as under the breast or in fat folds. All natural - all the time. That's Naturals by Myfootshop.com. Foot Care Tip! It's important to remember fungal infections aren't cured but only managed, and that means on-going treatment is required. The best way to do this is to get in the habit of using an antifungal soap, topical antiperspirant and topical antifungal cream once or twice daily depending on need. Keep the feet cool, dry and open to the air when possible. Remember to rotate shoes wearing them only every other day allowing them to dry thoroughly. Keep the feet open to the air when possible. Always use socks when wearing enclosed shoes.

18. Antifungal Nail Butter

Antifungal Nail Butter uses all natural ingredients to fight onychomycosis (fungal nails). Urea, a naturally occurring organic compound, debrides thick nails that have become infected with fungus. Antifungal Nail Butter also contains lavender and tea tree oil to fight yeast, bacterial, and fungal infections of the nail. Use in conjunction with a nail file or nail cutter to remove loose nail tissue. Each packet of Antifungal Nail Butter contains approximately enough product to treat one great toe nail for 30 days. Contains no artificial preservatives, coloring or perfumes. Net weight .3 oz for 3 tubes. Instructions for use: Clean the nail with soap and water, dry, and apply a liberal coating of Natural Antifungal Nail Butter. Do not cover with a bandage or Band-Aid. Covering the nail retains moisture and promotes growth of fungus. Repeat again for a total two applications each day. Debride diseased nail once a week with a nail file, cutter or pumice stone. Indications for Natural Antifungal Nail Butter: Use to treat fungal and yeast infections of the toe nails and finger nails, traumatic injuries of nails and thickening of nails due to injury. *Important* The degree to which the nail is infected or injured will dictate the duration of treatment. Small superficial areas of fungus may take a matter of weeks to treat. Advanced fungal infections or nail injuries may take 8-12 months to treat. It is important to continue to use Natural Antifungal Nail Butter until the nail is completely free of fungal infection. Ingredients - Urea (38%), Squalane, Lavender Tea Tree Clove Bud Essential Oil Blend, Ricinus communis (Castor) Oil flakes, Euporiba cerifera (Candelilla) Wax, Lanolin, Unpetroleum Jelly (Ricinus communis (Castor) Seed Oil, Hydrogenated Castor Oil, Beeswax, Copernicia cerifera (Carnuba) Wax).

19. Arch Binder

The Arch Binder slips over the forefoot and is worn around the arch, offering compression and support. The cotton-covered elastic bandage gently compresses sagging or displaced foot bones into a improved structural position. Great for painful arches and pain in the mid-foot caused by mid-foot sprains, metatarsal stress fractures and mid-foot osteoarthritis. Arch binders may be worn in all shoes. Washable. 1/pkg.

For proper sizing please measure the circumference of the mid-foot and use the following chart: Small is for measurements of 18-19 cm or 7-7.5 inches, Medium is for measurements of 20-21 cm or 7.5-8.5 inches, Large is for measurements of 22-23 cm or 8.5+ inches. Indications - Arch Binders are used in the care and treatment of mid-foot arthritis, arch pain, metatarsal fractures, metatarsalgia and mid-foot sprains. This also is a great brace to wear after Lisfranc's joint injuries.

Price: 9.95 USD

SKU: 730

Weight: 4.00 ounce(s)

20. Arch Binder with Metatarsal Pad

The Arch Binder with Metatarsal Pad is a cotton-covered elastic bandage gently squeezes sagging or displaced midfoot bones into a better structural position. The Arch Binder with Metatarsal Pad contains a removable metatarsal pad. The semi-firm metatarsal pad supports the forefoot. Fits in all shoes. Best of all, the arch binder with metatarsal pad offers barefoot arch and metatarsal support. Metatarsal pad is removable and replaceable. 1/pkg. Sizing is based on midfoot circumference: Small fits 18-19 cm (7"-7 1/2"), Medium fits 20-21 cm (7 3/4" - 8 1/4"), Large fits 22-23 cm (8 2/3" - 9 1/4"). Indications - The Arch Binder with Metatarsal Pad is used in the treatment of forefoot capsulitis, forefoot bursitis, Morton's neuroma, Freiberg's infraction, metatarsal stress fractures, forefoot pain, arch pain and metatarsalgia.

21. Arch Cookies - PPT

Arch cookies, also called scaphoid pads, provide soft support without the bulk of insoles. PPT Arch Cookies alleviate pain in the arch associated with high arches, weak arches, fallen arches, flat feet and pronation-related foot problems. These adhesive-backed pads conform well to the base and wall of shoes. We suggest when possible removing arch supports from shoes and placing these cookies on the floor and medial (inside) wall of shoes, then placing the shoes' original inner sole over the cookies. These cookies are designed as arch supports for sandals, dress shoes and other footwear not compatible with bulkier kinds of arch support. Measurements - (approximate) Small is 3 1/2 inches wide and 2 inches long, Medium is 3 3/4 inches wide and 2 1/4 inches long, Large is 4 inches wide and 2 1/2 inches long. PPT® is a frothed, open-cell urethane foam that provides excellent cushioning and shock absorption. PPT is among the most commonly used materials in podiatry offices, used in prescription orthotics and miscellaneous pads. PPT foam is lightweight, non-allergenic, breathable and long-lasting. Be sure to check out our other arch cookies, including Gel Arch Cookies and Pedag Step Arch Cookies. Indications - PPT Arch Cookies are used in the treatment of arch pain, flat feet and pronation.

Price: 9.95 USD

SKU: 947

Weight: 3.00 ounce(s)

22. Arch Cookies-Gel

Gel Arch Cookies support your arch, limiting pronation and reducing arch pain. Gel Arch Cookies are a visco-elastic soft gel arch support that alleviate pain associated with fallen arches, weak arches, flat feet and pronation-related problems. Adhesive backed and easy to place directly in the shoe. Wear them alone or with an insole. Great for pediatric and adult use. For greater comfort powder lightly daily. 1 pair/pkg. Arch cookies are the perfect substitute for a thicker, full length arch support. Gel arch cookies work well in dress shoes where there is limited space in the shoe. Small measures 3 inches long and 3/4 inch high. Fits pediatric sizes, women's size 5 and men's sizes 7-8, Medium measures 3 1/2 inches long and 1 inch high. Fits women's sizes 6-7, men's sizes 9-10, Large measures 4 inches long and 1 inch high. Fits women's sizes 8+, men's sizes 11+. Indications - Gel Arch Cookies are used in the treatment of flat feet, pronation, posterior tibial tendon dysfunction, arch pain and heel pain.

23. Ball of Foot Gel Pads

Ball of Foot Gel Pads are applied directly into the shoes to relieve foot pain and cushion the forefoot, metatarsal heads and ball of the foot. The pads are an ideal treatment of bursitis. The thin, silicone pads are covered with a sheer, polyester top. They provide foot protection and shock absorption and reduce calluses in dress shoes, high heels, work boots, bicycle shoes and ballet shoes. Hypoallergenic gel material is oil-based and safe for direct, prolonged contact. Gel is non-toxic and non-allergenic. Wash the pads with mild detergent and refresh them with talc powder. One size but can be cut to size.

Indications - Ball Of Foot Gel Pads are used in the treatment of bursitis, callus, capsulitis, forefoot pain, Freiberg's infraction, metatarsalgia, Morton's neuroma and sesamoiditis.

28. Calf Wedge Stretching Block

Doctors and physical therapists recommend calf stretching four to six times a day to treat foot and ankle conditions including plantar fasciitis and Achilles tendonitis. Our Calf Wedge Stretching Block comes with instructions for proper stretching. Clean with mild detergent. Measures 3 inches tall, 6 inches wide and 12 inches long. Latex-free. Made of gray foam. Indications - Calf stretching is an important part of treatment for foot and ankle problems including Achilles tendonitis, heel spur syndrome, plantar fasciitis, Sever's Disease, arthritis of the foot, cuboid syndrome and peroneal tendonitis. Foot Care Tip! Stretching is work, and who likes that, right? Here's two suggestions to make it easier. First, take a serrated knife and cut the Calf Stretching Block into two six-inch-by-six-inch blocks. Although you only can stretch one foot at a time now with the modified block, you can stretch in more than one place. Second, place the stretching blocks in places where you linger. Put a stretching block by the phone or in front of the television. Stretch while you're doing your make-up or brushing your teeth. Who said stretching had to be work?

30. Carbon Graphite Shoe Plate- Flat

The Carbon Graphite Shoe Plate makes shoes more rigid, limiting motion in the midfoot and forefoot. A shoe's rigidity or flexibility significantly affects the biomechanical properties of the foot and ankle. Shoe rigidity is important when treating fractures or arthritis of the midfoot or forefoot. Place The Carbon Graphite Shoe Plate beneath the shoe's existing insole, or wear The Carbon Graphite Shoe Plate with an over-the-counter insert or prescription orthotic. Sold individually Left or Right. Availability and Shipping: Turn around time to ship Carbon Graphite Shoe Plates may be longer than most of our products due to supplier availability of this product. Flat Carbon Graphite Shoe Plates usually ship within 7-10 days of placing your order. ***Several sizes of the Carbon Fiber Flat Plates are on backorder due to a supplier backorder. If you would like to know if the size you need is available prior to placing your order, please call us. This merchandise is shipping from Germany and we hope that all sizes will be available soon. Thank you for your patience.***Sizing: We strongly suggest that you use length rather than shoe size as the determining factor in deciding what size Carbon Graphite Shoe Plate to purchase. The best method is to take your current insole out of your shoe and measure it from the back of the heel to the tip of the toe. Then choose a plate that is the same length or slightly shorter than your current insert. Dimensions: Medium width only. 1/8" thick. See individual sizes for length. Indications - The Carbon Graphite Shoe Plate - Flat is used to treat metatarsal stress fractures, Freiberg's infraction, turf toe, midfoot arthritis and hallux limitus. Foot Care Tip! What are the differences between all of the carbon fiber/graphite plates sold at Myfootshop? The Carbon Graphite Shoe Plate - Flat contain no arch support or toe spring. Carbon Graphite Shoe Plates - Flat are recommended for metatarsal fractures and midfoot arthritis. Turf toe plates are thin, 3/4-length, unfinished carbon graphite made either with or without arch supports. The extension on turf toe plates underneath the great toe (called a Morton's extension) is best for hallux limitus, turf toe and hallux rigidus. Hallux Trainers are a full length finished carbon graphite insert with Morton's extension that have the same indications as turf toe plates. Carbon Spring Plates are ultra-thin, full-length arch supports. A toe spring creates a forefoot rocker, off-loading forefoot pain. They're indicated for metatarsal fractures, forefoot capsulitis, forefoot bursitis and Freiberg's infraction. Myfootshop Carbon Fiber Foot Orthotics are a traditional full length or 1/2 length finished carbon/graphite orthotic that may be used for sport, work or everyday use. Disclaimer: Shoes designs (called the shoe last) vary so that matching insoles and shoes is never a precise science. Placing a rigid insert (Spring Plate, Molded Turf Toe Plate, Flat Turf Toe Plate, Flat Carbon Fiber Plate) into your shoe may cause wear. The rigidity of these carbon fiber inserts may damage the softer cloth shoe last. Myfootshop.com is not responsible for any damage to your shoes that may be caused by use of these products.

31. ClearZal Fungal Nail Care System

ClearZal Fungal Nail Care System contains the active ingredient benzalkonium chloride, a topical antiseptic active against bacteria and fungus. Antiseptics inhibit the growth of micro-organisms including fungi, bacteria and viruses. ClearZal Antifungal Nail Care System also contains aloe vera to condition and soften damaged nails. The ClearZal Fungal Nail Care System kit includes a bottle of antifungal solution and a nail file to debride infected nail prior to treatment. The dropper-tipped delivery system is 99.9 percent effective against bacteria and fungus. Alcohol and oil free formula won't dry skin. Use it between applications of artificial nails and nail polish. 1-1 fluid oz. bottle. Indications - The ClearZal Fungal Nail Care System is used in the treatment of fungal nail infections or onychomycosis. Foot Care Tip! A topical antifungal treatment can be as successful as an oral treatment, but topical medications require patience and compliance. Fungus doesn't take a day off, so compliance is key. You need to treat the nail daily to inhibit fungal growth. Inhibiting fungal growth allows the healthy nail to grow faster than the fungus. Over time the healthy nail overtakes the fungus and the nail clears. Success may require four months of topical treatment for mild cases and 12 months for severe infections. Other fungal nail care tips - Periodic debridement of thick, fungal nails should be performed with a nail cutter on a regular basis to enable ClearZal Fungal Nail Care System to reach the fungal elements of the nail. Thick fungal nails that require chemical debridement should be treated with Natural Antifungal Nail Butter. Natural Antifungal Nail Butter contains 40% urea, a naturally occurring nitrogen crystal that debrides nail tissue while treating fungal nails with tea tree oil. A medicated nail polish that comes in colors? Be sure to check Just For Toenails, the topical antifungal nail polish that comes in multiple colors.

32. ClearZal Hard Skin Remover

ClearZal Hard Skin Remover gently exfoliates and softens rough, dry skin. ClearZal Hard Skin Remover contains a unique combination of salicylic acid, urea and trichloroacetic acid, which works to reduce calluses and heal dry and cracked feet. Exfoliates and removes dead skin while a hydrating agent adds elasticity, making skin supple and moist. Safe to use daily. 3.4 oz. tube.

Indications - ClearZal Hard Skin Remover is used in the treatment of calluses, skin fissures, heel fissures and cracked heels.

Foot Care Tip! ClearZal Hard Skin Remover is a chemical debridement cream using a combination of acids to debride calluses. It's powerful stuff. Chemical debridement creams should be used with a mechanical debridement tool to remove the bulk of calluses. Tools such as a Callus File, Pumice Stone or Safety Callus Trimmer will help you use less cream and save money.

33. Co-Flex Bandage - 1 Inch

Use your imagination to create new splints and bandages with Co-Flex Bandages. The Co-Flex Bandage is a self-adherent bandage used to wrap broken toes and hammer toes. Co-Flex bandages can help control swelling after hammer toe surgery. Easy to cut and modify and can be reused several times. 1-inch, 5-yard roll. Mixed colors. Great for fingers, too! 2 rolls/pkg. Indications - The Co-Flex Bandage is used in the treatment of broken toes, hammer toes, claw toes and mallet toes. Foot Care Tip! Think of the Co-Flex Bandage as a cast for toes and fingers that can help to mend fractures in three ways. First, wrapping a broken digit stabilizes the fracture and promotes healing. Second, Co-Flex controls swelling. Lastly, wrapping a broken digit with Co-Flex limits motion, significantly decreasing post-fracture pain.

34. Corn Protectors

Only your imagination limits the number of ways Corn Protectors can relieve sore feet. Use scissors to shape Corn Protectors and wear them on the tops of toes or in between toes, easing corns, calluses and hammer toes. Corn Protectors are adhesive-backed, 1/8-inch foam pads. Non-acidic and safe for sensitive skin. Latex-free. 20/pkg. Indications - Corn Protectors are used in the treatment of corns and calluses, hammer toes, mallet toes and claw toes. Foot Care Tip! Soft corn pads can be cut and modified to treat many different kinds of corns. Use the full pads on the tops of toes to protect hard corns (heloma dura) against shoe pressure. Cut the pads in half to treat soft corns (heloma molle) between toes or Lister corns on the sides of toes. Or use half of the pads to separate toes and prevent soft corns.

35. Cuticle Nipper

Cuticle Nippers are an ideal nail tool for removing excess cuticles and hang nails. Great for trimming thin nails in tight places. The small, stainless steel head is designed for precision in tight areas. The 4-inch, gold-finish handle is easy to hold. Cuticle clippers differ from nail cutters in that they have a basket-shaped cutter box, enabling delicate removal of soft tissue. Used by nail care professionals. 1/pkg. Indications - Cuticle nippers are used in the treatment of corns and calluses, light nail trimming and recurrent ingrown nails.

36. Dancer's Pads - Economy Felt

Economy Felt Dancer's Pads shift weight away from the big toe joint and sesamoids onto the pad, relieving big toe joint pain, forefoot pain, stress and discomfort. The cut-out shape off-loads weight away from the first metatarsal joint. Wear the pads on the skin or in shoes. Economy Felt Dancer's Pads are 1/4" thick adhesive-backed pads. Choosing right or left: Choosing the correct dancer's pad for your specific needs can sometimes be tricky. Here are some examples of how to choose the correct pad - if you are having trouble with your left big toe joint and want to wear the Dancers' Pads on your skin, then you should buy a package of left dancer's pads. If you want to treat your left foot and place the pads in your shoes, however, you need to reverse them, so you should purchase a package of right Dancer's Pads. Of course the opposite is true if you are having trouble with your right big toe joint. If you wish to off-load a problem beneath the little toe joint, and you wish to apply the dancer's pad to the skin, then you would purchase the opposite side that you would need if you were treating your big toe. If you are treating your left 5th toe and want to place the pad on the bottom of your foot, you should purchase a package of right Dancers' Pads. And if you wish to place the pad in your right shoe to treat a problem beneath the little toe joint, then you would do the opposite and purchase a package of left Dancers' Pads. Confused? Click on chat and we'll walk you through it. Measurements: Pads measure 1/4" thick, 3 1/2" across and 3" long.

Economy Felt Dancer's Pads are part of a family of metatarsal pads we carry at Myfootshop.com. If you have any questions about which pad is best for you be sure to contact us for advice prior to purchasing. Indications - Dancer's pads are used in the treatment of sesamoiditis, sesamoid fractures, hallux limitus, hallux rigidus, turf toe, forefoot pain, forefoot capsulitis, Morton's neuroma, metatarsalgia and forefoot bursitis.

37. Dancer's Pads - Premium Felt

Dancer's Pads - Premium Felt, off-load the ball of foot and the great toe joint. The cut-out area surrounds the great toe joint and re-distributes load onto the pad, relieving forefoot pain. These pads get their name because of their skived or rounded edges and often are used by dancers to relieve forefoot pain. Adhesive-backed. 2/pkg. Choosing right or left: Choosing the correct dancer's pad for your specific needs can sometimes be tricky. Here are some examples of how to choose the correct pad: If you are having trouble with your left big toe joint and want to wear the Dancers' Pads on your skin, then you should buy a package of Left dancer's pads. If instead you want to place the pads in your left shoe to treat a left foot problem, you need to reverse them, so you should purchase a package of Right pads. If you wish to off-load a problem beneath the little toe joint, and you wish to apply the dancer's pad to the skin, then you would purchase the opposite side that you would need if you were treating your big toe. If you are treating your left 5th toe and want to place the pad on the bottom of your foot, you should purchase a package of right Dancer's Pads. And if you want to treat a callus beneath the 5th toe and you wish to place the pad in your shoe, then you would do the opposite and purchase a package of left Dancer's Pads. Please click on the Demonstration Video tab to watch our video for proper placement of dancer's pads. Measurements: Pads measure 1/4" thick, 3 1/2" across and 3" long.

Premium Felt Dancer's pads are part of a family of metatarsal pads we carry at Myfootshop.com. If you have any questions about which pads are best for you be sure to contact us for advice prior to purchasing. 39. Diabetic Foot Cream

Natural Diabetic Foot Cream is a gentle hydrating cream that is both antibacterial and antifungal. Diabetic Foot Cream also uses 0.025% capsicum to treat the symptoms of diabetic peripheral neuropathy. Daily use of Diabetic Foot Cream desensitizes peripheral pain fibers thereby decreasing the painful symptoms of diabetic peripheral neuropathy. Contains no artificial preservatives, coloring or perfumes. For topical use only. Wash hands following use. 4 oz. jar. Indications for use - Natural Diabetic Foot Cream is used in the treatment of dry skin, superficial cellulitis, bacterial infections of the skin, fungal infections of the skin and diabetic peripheral neuropathy. Directions for use - Wash and dry area to be treated. Apply 3-4 times a day to the bottom and sides of the feet. Allow to dry. Contains oils derived from hot peppers - be sure to wash your hands following application. Use caution not to wipe you face or eyes until your hands have been washed.

40. Dorsal Night Splint for Plantar Fasciitis

The Dorsal Night Splint for Plantar Fasciitis works while you sleep, gently stretching the Achilles tendon, calf and plantar fascia. Stretching and increasing flexibility in the calf reduces the risk of further strain and tearing of the plantar fascia. The plantar fasciitis splint is designed for wear during sleep or inactivity. Because the brace is applied to the dorsal aspect or top of the foot, there is no need to remove it for a quick trip to the restroom. Design allows for walking short distances. Regular fits women's sizes up to 10, men's sizes 5-9, Large fits women's sizes 10 -15, men's sizes 9 -14. Posterior night splints also are available from Myfootshop.com. Posterior night splints are a nonambulatory splint designed to provide a more aggressive stretch. Indications - The Dorsal Night Splint for Plantar Fasciitis is used in the treatment of plantar fasciitis, heel spur syndrome, heel pain, Achilles tendonitis, Sever's Disease and retrocalcaneal bursitis.

41. Double Ended Nail File

The Double-Ended Nail File is essential for podiatrists and nail care technicians. Our Double-Ended Nail File features fine narrow filing tips to reach tight corners, sculpt nails and remove unwanted calluses from nail margins. Great as an ingrown nail home treatment. Stainless steel. Measures 6 inches (14 centimeters). 1/pkg. Indications - The Double-Ended Nail File is used in the treatment of ingrown nails or paronychia, onychomycosis, fungal nail infections, after injuries to the nail and also for proper nail trimming. Foot Care Tip! Most ingrown nails result from poor nail trimming that leaves a small hook or spur on the distal tip of the nail. This spur often is hard to access with nail cutters or nail scissors. The Double-Ended Nail File solves that problem and allows you to rasp nail spurs, preventing ingrown nails.

42. Double-Stall Tubular Foam Toe Bandages

Double-Stall Tubular Foam Toe Bandages instantly separate and cushion toes that rub while reducing pressure and friction. The bandages buddy-splint toes, stabilizing hammer toes, overlapping toes and painful injuries such as broken toes. Double-Stall Tubular Foam Bandages relieve pressure and friction that cause corns, calluses, blisters, bunions, crooked toes, ingrown nails and other irritations. The Double-Stall Tubular Foam Toe Bandages can be used as a splint after hammer toe surgery or to protect sore corns from rubbing in shoes.

Fabric-lined interior. Can be cut and shaped with scissors to make toe and nail protectors, bunion shields and more. Intended for use with lesser toes. Great for fingers, too. Compresses for proper shoe fit. Hand wash with warm, soapy water. Latex-free. Choose between one 5" piece or four 1" pieces. Indications - Double-Stall Tubular Foam Toe Bandages are used in the care and treatment of hammer toes, claw toes, mallet toes, toenail injuries and fractured toes.

45. Evenup Shoe Leveler

The Evenup™ Shoe Leveler is a new, innovative device that reduces leg length discrepancy, alleviating body strain while walking in a cast or fracture shoe. The shoe leveler improves uneven gait and balance, eliminating low back pain and hip pain often associated with a walking cast. The height is adjustable, offering two thicknesses: 1.3 cm (1/2 inch) and 2.1 cm (3/4 inch). The shoe leveler does not correspond to shoe size. Instead, measure your shoe sole to determine your appropriate size. It generally is best to choose a leveler that is too small rather than too big. Small fits Women's shoe size 5.5 - 8.5 and Men's 5.5 - 8.5, Medium fits Women's shoe size 9 - 11 and Men's 9-11, Large fits Women's shoe size 11.5 +, and Men's 11.5 - 13. Indications - The Evenup™ Shoe Leveler is used to balance leg length while wearing a walking cast.

46. Felt Bunion Shield

Our Felt Bunion Shield is made of double-ply felt and is considered the "old reliable" of bunion pads. Great for patients who are not able to undergo bunion surgery. Wear the pad directly against the skin. A small elastic band surrounding the great toe holds the pad in place. We suggest wearing hose or a sock to help keep the pad in position. Latex-free. Wash by hand with mild soapy water. Air dry. Universal right/left. 1/pkg.

Indications - The Felt Bunion Shield is used to prevent pain and shoe pressure associated with bunion (also called hallux valgus).Foot Care Tip! Bunion pain is caused by shoe pressure, mal-alignment of the great toe or both. The Felt Bunion Shield protects bunions from shoe pressure but does not re-align the big toe joint. Many patients who use a Felt Bunion Shield also use a Large/Firm Toe Separator to re-align the great toe. Additional products that relieve shoe pressure and align the great toe include our Bunion Spacer with Stay Put Loop and Toe Spacer Bunion guard Combo.

49. Forefoot Callus Protectors

Forefoot Callus Protectors are 1/8-inch thick, adhesive backed cushions made of soft felt that ease bottom-foot pressure and pain in the ball of the foot. The protectors prevent ball-of-foot calluses from worsening and ease pain in the metatarsals caused by dropped metatarsal heads. Great for pump bumps on heels and tailor's bunions, too. These adhesive-backed protectors also are effective when placed directly in shoes. 8 pads/pkg. Indications - Forefoot Callus Protectors are used in the care and treatment of forefoot calluses, capsulitis, Haglund's deformity, saddle bone deformities, tailor's bunions and painful warts. Foot Care Tip! The number of ways you can use Forefoot Callus Protectors is limited only by your imagination. Use scissors to modify the protectors for foot conditions including Haglund's deformity, saddle bone deformities and other lumps and bumps so common to the foot.

52. Gel Bunion Spacer

Gel Bunion Spacers treat bunion pain, big toe pain and big toe joint swelling by realigning the great toe. Gel Bunion Spacers reduce friction and irritation between adjacent or overlapping toes caused by hallux valgus. Use Gel Bunion Spacers after bunion surgery to assist with proper healing and alignment. Gel Bunion Spacers are made of medical-grade silicone rubber impregnated with mineral oil which softens corns and calluses and keeps skin healthy. The gel lasts much longer than similar pads made of felt or foam. Hand wash in warm soapy water. Latex-free. Universal right/left. 3/pkg. Although sizing may vary we recommend the following: Small fits women's sizes 5-7, men's sizes 4-6, Medium fits women's sizes 7-10, men's sizes 6-9, Large fits women's 10-13+, men's size 9-12+. Indications - Gel Bunion Spacers are used in the care and treatment of poorly aligned bunions. Also great as a splint to maintain alignment of the great toe after bunion surgery.

Price: 6.95 USD

SKU: 710

Weight: 4.00 ounce(s)

53. Gel Bunion Spacer with Stay-Put Loop

The Gel Bunion Spacer with Stay-Put Loop treats bunion pain by aligning the big toe joint. Slip the Gel Bunion Spacer with Stay-Put Loop between the first and second toes and the soft, flexible loop holds the spreader in place. Use the smaller sizes between the lesser toes to reduce friction and irritation between adjacent or over-lapping toes. Great after bunion surgery to assist with proper healing and alignment. Made of medical-grade silicone rubber and impregnated with mineral oil and vitamin E to soften corns and calluses and keep skin healthy. The silicone gel lasts longer than similar pads made of felt or foam. Hand wash in warm, soapy water. Latex-free. Universal right/left. 2/pkg.

Although sizing may vary we recommend the following:Medium fits women's sizes 5-10, men's sizes 6-9, Large fits women's sizes 10+, men's sizes 9+.Indications - The Gel Bunion Spacer with Stay-Put Loop is used to treat bunions.

55. Gel Heel Spur Pads

Gel Heel Spur Pads reduce shock and protect the heel from heel strike pain. The pads were designed using human gait analysis to relieve heel pain when walking. Wear them with the removable pad for maximum relief from sore heels. Pop out the removable, central pad for protection around a heel spur. The pads are non-toxic and non-allergenic. Hand wash and air dry. The heel is 1/4" thick. Small fits women's sizes 4.5-6, men's sizes 3-4.5, Medium fits women's sizes 7-8.5, men's sizes 5-7, Large fits women's sizes 9-11, men's sizes 8+. Indications - Gel Heel Pads with Removable Pads are used in the treatment of Baxter's nerve entrapment, heel pain, heel spur syndrome, plantar fasciitis and Severs disease.

Price: 12.95 USD

SKU: 910

Weight: 6.00 ounce(s)

56. Gel Metatarsal Pads

Gel Metatarsal Pads offer relief from ball-of-foot pain. Place the adhesive-backed pads in shoes beneath the weight-bearing surface of the forefoot to reduce pressure on the ball of the foot and metatarsal heads. The foot pads off-load weight away from the forefoot, provide shock absorption and reduce calluses and inflammation in the forefoot. Because they are clear they work great in sandals. Oil-based and safe to wear for extended periods of time. Non-toxic, nonallergenic and latex-free. Dimensions: 2" long, 1 1/2" wide, 1/4" deep. Indications - Gel Metatarsal Pads are used in the treatment of forefoot callus, forefoot bursitis, forefoot capsulitis, forefoot pain, Freiberg's infraction, metatarsalgia and Morton's neuroma.

58. Gel Toe Caps

Gel Toe Caps protect toes and toe nails from blisters, rubbing, irritation and toe nail loss. Gel Toe Caps absorb pressure applied to the tips of toes and prevent direct contact with shoes. Gel Toe Caps are great for sore nails, toe nail injuries and pain in toes. Gel Toe Caps are made of custom-grade silicone gel designed to stretch and stay in place. Soft enough to soothe toe nail pain but firm enough to hold up under the most strenuous activities. Gel Toe Caps fit in all shoes. Great for fingers, too. Latex-free. Universal right/left. 3/pkg. Indications - Gel Toe Caps are indicated in cases of recurrent injuries to toe nails, runner's nail, subungual exostosis, recurrent ingrown nails and painful onychomycosis.

Price: 13.95 USD

SKU: 871

Weight: 6.00 ounce(s)

59. Gel Toe Protector

Gel Toe Protectors cushion and separate toes that rub while reducing pressure, friction and pain between toes. Gel Toe Protectors relieve corns, cysts, blisters on toes, crooked toes, hammer toes and ingrown nails. The fabric-covered gel cap on the Gel Toe Protector protects toes and stretches over the entire toe, completely surrounding it with a vitamin-enriched gel that releases mineral oil to soothe and moisturize skin. The Gel Toe Protector also works to protect diabetic wounds of the tip of the toe. Works well on fingers, too! The elastic mesh toe tubes stretch to fit and can be trimmed with scissors to fit any toe or finger. Hand wash in warm, soapy water and allow to dry before using again. Latex-free. Universal right/left. 2/pkg. Sizing: Small/Medium for the lesser toes (2-5), Large/X-Large for the big toe. Please refer to our Foam Toe Cap if you prefer an even larger, softer toe cap. Indications - Gel Toe Protectors are used in the care and treatment of hammer toes, claw toes, mallet toes, toe nail injuries, corns, calluses and fractured toes.

Price: 11.95 USD

SKU: 697

Weight: 4.00 ounce(s)

60. Hallux Trainer Insoles

The Hallux Trainers combine a rigid turf toe plate, called a Morton's extension, with a full length arch support. The foam upper is made with Memopur[®], which is an antifungal, high-tech viscoelastic memory foam that responds to the weight and temperature of your body. The Morton's extension is made with a firm polypropylene that is extra durable and thicker at the arch. The top cover is antifungal Vitatex, a synthetic micro suede that stretches and moves with your movements. The Hallux Trainers have a built-in metatarsal pad. 1 pair/pkg.

Made in Germany. Hand washable with mild soap. Air dry. Availability and Shipping: Turn around time to ship Hallux Trainers may be longer than most of our products due to supplier availability of this product. Hallux Trainers usually ship within 7-10 days of placing your order. Hallux Trainers do qualify for free shipping and will be shipped by USPS First Class Mail. ***5/17/16: Many sizes of the Hallux Trainers are backordered from the manufacturer in Germany. Please call us if you want to know if your size is available. Thanks for your patience! ***Sizing: The Hallux Trainer is a replacement insole intended to replace your current shoe insert. We strongly suggest that you use actual foot length rather than shoe size as the determining factor in deciding what size Hallux Trainer to purchase. The best method is to take an insole out of a shoe you wear regularly and measure it from the back of the heel to the tip of the toe. Select a size of Hallux Trainer similar to the size of your current insert. Indications - Hallux Trainers are used in the treatment of hallux limitus, hallux rigidus, turf toe, gouty arthritis and rheumatoid arthritis of the great toe joint. Foot Care Tip! What are the differences between all of the carbon fiber graphite plates sold at Myfootshop.com? These four inserts are best used to treat hallux limitus and hallux rigidus and turf toe. Hallux Trainers combine the 3/4 length turf toe plate with a finished insole that also has a metatarsal pad to aid in off-loading weight away from the big toe joint. Molded Turf toe plates are thin, 3/4-length, carbon graphite arch supports, with a molded arch and Morton's extension. Flat Turf Toe Plates are similar to the molded plates, but are completely flat, with a Morton's extension. Carbon Spring Plates are ultra-thin, full-length arch supports. A toe spring creates a forefoot rocker, off-loading forefoot pain. They're indicated for metatarsal fractures, capsulitis, bursitis and Freiberg's infraction. Additional carbon fiber inserts include; Flat carbon plates contain no arch support or toe spring. They're recommended for metatarsal fractures and midfoot arthritis. Myfootshop Carbon Fiber Foot Orthotics are a traditional full length or 1/2 length finished carbon/graphite orthotic that may be used for sport, work or everyday use.

65. Heel Cups - PQ Gel

The PQ Gel Heel Cup, made with a proprietary Viscoelastic Polymer gel formula, dampens and reduces heel strike shock waves and alters their direction from vertical to horizontal, making walking and running more comfortable. The shock absorption can help reduce knee and hip pain as well. The gel won't harden, crack, dry out or compress, and can be hand washed in warm soapy water. For best results, powder lightly each day. The heel is 1/4" thick. Measurements - Small fits Women's 5-8/Men's 4-6, Medium fits Women's 9-11/Men's 7-10, and Large fits Women's 12+/Men's 11-15 Indications - PQ Gel Heel Cups are used in the treatment of heel pain, heel spurs, Baxter's nerve compression, plantar fasciitis, and Sever's Disease.

67. Heel Lifts For Plantar Fasciitis - Cork

Beat heel pain with a simple heel lift. Heel lifts are an effective and simple treatment for plantar fasciitis, heel spurs, Achilles tendonitis and Sever's Disease. Raising the heel weakens mechanical forces applied to the foot by the calf, easing plantar pain and allowing the plantar fascia and Achilles tendon to heal. Trim to fit your shoes with a pair of scissors. Universal right/left. One size fits all; trim to fit. 1 pair/pkg. Measurements: 3/8" thick x 4.25" long x 2.5" wide. Indications: Heel Lifts For Plantar Fasciitis - Cork are used in the treatment of heel spur syndrome, plantar fasciitis, Sever's disease, retrocalcaneal bursitis, Achilles tendinitis and partial ruptures of the Achilles tendon.

Foot Care Tip - Use a heel lift with a calf-stretching program to treat plantar fasciitis pain and Achilles tendonitis.

68. Heel Lifts For Plantar Fasciitis - Felt

Beat heel pain with a simple heel lift. Heel lifts are an effective and simple treatment for plantar fasciitis, heel spurs, Achilles tendonitis and Sever's Disease. Raising the heel weakens the mechanical forces applied to the foot by the calf, easing plantar pain and allowing the plantar fascia and Achilles tendon to heal. Felt heel lifts are durable and moisture absorbant. Compact felt that won't compress in patients up to 300 lbs. Adhesive backed. Easy to trim with scissors to fit into any shoe. Universal right/left. One size fits all; trim to fit. 1 pair/pkg. Measurements: 3 3/4" long x 2 3/4" wide by 1/4" thick. Indications: Heel Lifts For Plantar Fasciitis - Felt are used in the treatment of heel spur syndrome, plantar fasciitis, Sever's disease, retrocalcaneal bursitis, Achilles tendinitis and partial ruptures of the Achilles tendon. Foot Care Tip - Use a heel lift with a calf-stretching program to treat plantar fasciitis pain and Achilles tendonitis.

69. Heel Lifts for Plantar Fasciitis - Foam

Beat heel pain with a simple heel lift. Heel lifts are an effective and simple treatment for plantar fasciitis, heel spurs, Achilles tendonitis and Sever's Disease. Raising the heel weakens the mechanical forces applied to the foot by the calf, easing plantar pain and allowing the plantar fascia and Achilles tendon to heal. Foam heel lifts are the softest of our line of heel lifts and will compress more than our felt or cork heel lifts. They can be used in conjunction with cork or felt lifts to add extra cushion. Adhesive backed. Universal right/left. One size fits all; trim to fit. 1 pair/pkg. Measurements: 4" long x 2 3/4" wide x 1/4" thick. Indications: Heel Lifts For Plantar Fasciitis - Foam are used in the treatment of heel spur syndrome, plantar fasciitis, Sever's disease, retrocalcaneal bursitis, Achilles tendinitis and partial ruptures of the Achilles tendon. Foot Care Tip - Use a heel lift with a calf-stretching program to treat plantar fasciitis pain and Achilles tendonitis.

70. Heel Wedges - PPT

Flatfeet are notorious for causing ruined shoes and arch pain. PPT Heel Wedges limit flattening of the arch, or pronation, reducing shoe wear and comforting tired, flatfeet. Our Heel Wedges-PPT can be reversed and worn in the opposite shoes to correct supination, or prevent your feet from rolling outward. The PPT foam material is considered the best for shock absorption, cushioning and comfort. Reverse the right and left wedges to limit rolling to the outside of shoes, or supination. Adhesive-backed and medium density. Wear these shoe inserts for pronation in any shoes. Latex-free.

PPT Heel Wedges are part of a family of heel wedges at Myfootshop.com. Indications - PPT Heel Wedges are used in the treatment of flatfeet, pronation and supination.

Price: 6.95 USD

SKU: 945

Weight: 3.00 ounce(s)

71. Heel Wedges - Rubber

Rubber Heel Wedges align the heel in the shoe, stabilizing the heel and reducing shoe wear. The wedges are made of firm natural rubber beveled to a slant. Place the wedges in the shoe to correct pronation or supination of the foot or to straighten the position of the heel, relieving foot and heel problems. Keep the wedges in place by sliding them beneath the shoe's insole or by using adhesive bond. The wedges conform to shoe shape and are intended for enclosed shoes. Right and left are marked, but the wedges may be reversed and used on the medial or lateral heel. Small is 3 inches long, 1/8 inch thick, Medium is 3 1/2 inches long, 1/4 inch thick, Large is 4 inches long, 1/4 inch thick. Although sizes may vary we recommend the following: Small fits women's sizes 5/6, men's sizes 8/9, Medium fits women's size 7, men's size 10, Large fits women's sizes 8+, men's sizes 11+. Indications - Heel wedges are used in the care and treatment of pronation, supination, flatfeet and uneven shoe wear.

72. Herbal Soaking Salts

Natural Herbal Soaking Salts are a combination of Dead Sea salts and Epsom, menthol crystals and a mix of aromatic herbs including lavender flowers, chamomile, comfrey, roses and orange peel. Natural Herbal Soaking Salts are used to treat superficial rashes, bacterial infections and fungal infection. With repeated use, Natural Herbal Soaking Salts dessicate (dry) the skin. Drying the skin helps to draw superficial drainage from skin infections enabling the skin to heal more quickly. We recommend using Natural Herbal Soaking Salts with Healing Cream to rehydrate the skin following soaks. Recommended for external use only. Net wt. 4 ounces. When mixed with water, each jar of Natual Herbal Soaking Salts makes up to 6 gallons of natural soaking solution. Contains no artificial preservatives, coloring or perfumes. Indications - Soothes aches and pains, softens corns and calluses, relieves itching and minor rashes, jock itch, diaper rash, athlete's foot, eczema, atopic dermatitis and stasis dermatitis. Natural Herbal Soaking Salts may also be used to treat contact skin allergies such as poison ivy or poison oak.

74. Just For Toenails Medicated Nail Polish

Just For Toenails Medicated Nail Polish is the first color nail polish with Melaleuca alternifolia or tea tree oil, a proven nail care treatment and natural antifungal and antibacterial. Tea tree oil has been shown to kill many types of fungal and bacterial organisms and often is recommended by podiatrists as a toe nail fungus treatment. 1/2 fluid oz. bottle. 1/pkg. To prevent discoloration of the natural nail always use the clear polish as a base coat, then use two coats of your favorite color and seal it with a final coat of clear. Just For Toenails Medicated Nail Polish is free of formaldehyde, toluene and phthalate. Just For Toenails contains lacquer as a vehicle for the nail color. Lacquer build-up may inhibit the active ingredient in the polish, so we recommend removing the polish before re-applying it to ensure the active ingredient works. We also recommend using other lacquer-free antifungal medications between applications, such as Tineacide Antifungal Cream or Clearzal Fungal Nail Care System. Colors Clear: Shiny clear Romance Red: Shiny bright red Mauve: Pearlized soft darker pink Burgundy: Shiny dark burgundy Pretty Pink: Shiny light pink Hickory Trickery: Pearlized lavender Royal Fool's Gold: Pearlized bronze-gold Amethyst & Daimonds: Pearlized purple Robin the Cradle: Shiny robin's egg blue Mad Money: Pearlized dark green Indications - Just For Toenails Medicated Nail Polish is used in the treatment of fungus toe nail, onychomycosis, runner's nail, toe nail fungus and toe nail injuries.

82. Longitudinal Arch Cookies - Felt

Longitudinal Arch Cookies provide arch support without the bulk of orthotics or insoles. These arch pads are made of 1/4" thick natural felt and have an adhesive backing. Arch Cookies alleviate pain in the arch associated with fallen arches, weak arches, high arches, flatfeet and pronation-related foot problems. These adhesive-backed pads conform well to the base and wall of shoes. We suggest when possible, removing the insoles from shoes and placing The Longitudinal Arch Cookies on the floor and medial (inside) wall of your shoes, then placing the shoes' original insole over the cookies. These arch pads are ideal for shoes with little or no built-in arch support such as dress shoes and other low profile footwear. Adhesive backed. Latex-free. Measurements: 4 1/2" long by 2 1/2" wide by 1/4" thick. Can be trimmed to fit. Be sure to check out our other arch cookies, including Gel Arch Cookies and Pedag Step Arch Cookies and PPT Arch Cookies. Indications - Longitudinal Arch Cookies are used in the treatment of arch pain, flatfeet and pronation.

83. MalleoLoc Ankle Brace

The MalleoLoc Ankle Brace stabilizes weak ankles while enabling free range of motion of the joint. The outside stay fits just ahead of the outside ankle bone or fibula while the inner stay fits just behind the medial ankle bone or tibia. This unique design leaves the foot open for maximal dorsiflexion and plantarflexion while limiting inversion and eversion of the ankle. This focus on sagittal plane motion improves your game by allowing to be more active. Great ankle support for everyday athletics. Figure-eight Velcro strapping remains secure with the most vigorous activity. Brace components are color-coded for easy application. Heat moldable for custom fit. Fits all shoes. Latex-free. 1/pkg. Sizing is based on heel width: Regular measures less than 2 1/4 inches. Wide measures greater than 2 1/4 inches. Indications - The Malleoloc Ankle Brace is used to treat chronic lateral ankle sprains and ligamentous laxity of the lateral ankle. The Malleoloc Ankle Brace may be used in rehab for acute ankle sprains and after lateral ankle surgery. Also may be used in sports to prevent ankle sprains. Additional indications include treatment of chronic peroneal tendonitis and peroneal tendon subluxation. Foot Care Tip! When shopping for an ankle brace ask yourself this question: Am I looking for a brace that provides lateral ankle stability or compression for control of swelling? On a scale of 1-5 (1 poor/5 best) we rate the Malleoloc Ankle Brace a '5' for control of instability and '2' for control of swelling. We primarily recommend the Malleoloc Ankle Brace for active users who require long-term control of instability in sports. Be sure to check each of our other ankle supports for additional information.

84. Medi-Heel Lift

The Medi-Heel Lift is an extra-firm heel lift that corrects functional and anatomical leg length discrepancies, which are among the leading causes of hip and low back pain. Place the lift in the shoe of the short leg, balancing the pelvis and reducing hip and lumbar pain. The lift often is helpful in cases of chronic leg pain and sciatica. Wear it in any shoe. A doctor can determine the optimal thickness. If you are new to wearing a heel lift we suggest starting with a thinner lift. Additional lift can be added at any time. Medi-Heel Lifts are molded from a pliable, resilient, washable plastisol (not rubber) that is latex and allergy free. Choose from thickness ranging from 3-12mm. 1 pair/pkg. Indications - The Medi-Heel Lift is used in the treatment of leg length discrepancies, Achilles tendonitis, partial ruptures of the Achilles tendon, Sever's Disease, heel pain, heel spur syndrome and plantar fasciitis.

85. Metatarsal Bar PPT Cushions

Metatarsal Bar PPT Cushions protect and spread the metatarsal bones in the ball of the foot, relieving most causes of forefoot pain. Metatarsal Bar PPT pads transfer weight away from sore metatarsal bones and painful calluses. Place the pad behind the ball of your foot to off-load weight bearing away from your forefoot. If you need help figuring out where to place your metatarsal bar, please click on the Demonstration Video tab to watch our video. Use the cushions with our Myfootshop Sport Carbon Fiber Full length Orthotics, or place them directly in shoes. PPT® is a frothed, open-cell urethane foam that provides unbeatable shock absorption and cushioning. PPT is among the most commonly used materials in podiatry offices, and in prescription orthotics and miscellaneous pads. PPT foam is lightweight, breathable, non-allergenic, and long-lasting. Hypoallergenic. Latex-free. Measurements: (approximate) Small measures 1/8" thick by 2" wide by 2 1/4" long, Medium measures 3/16" thick, 2 5/8" across and 2 1/2" long, Large measures 1/4" thick, 3" across, and 2 3/4" long. Indications - Metatarsal Bar PPT Cushions pads are used in the treatment of bursitis, capsulitis, callus, forefoot pain, Freibergs infraction, metatarsalgia, Morton's neuroma. Foot Care Tip! PPT Metatarsal Pads are part of a family of metatarsal pads we offer at Myfootshop.com. If you have any questions regarding the correct metatarsal pads for you be sure to contact us prior to purchase.

91. Moisturizing Callus Butter

Natural Moisturizing Heel Butter was developed by our staff based on requests from our customers. Moisturizing Heel Butter is designed to treat especially hard, heavy calluses and dry heels. We like to think of it as a prescription strength skin lotion in stick form. Moisturizing heel Butter with no water or alcohol that can dry the skin. Directions for use - Be sure the feet are clean and dry before use. Use a callus file or pumice stone to debride superficial callus prior to application of Moisturizing Heel Butter. For best results cover the feet with socks to maintain the soothing, moisturizing effect. Indications - Natural Moisturizing Heel Butter is used in the treatment of corns and calluses, cracked heels, dry skin, heel fissures, callus and forefoot fissures. Moisturizing Heel Butter is also indicated in the treatment of cracked hands, fissures of fingers and dry hands. Foot Care Tip! Use a pumice stone or callus shaver to debride the hard, superficial layer of callus prior to applying Moisturizing Heel Butter. Daily mechanical debridement of the callus followed by application of Moisturizing Heel Butter will decrease the amount of Moisturizing Heel Butter needed (and save you a couple of bucks).

93. Myfootshop Casual Carbon Fiber Orthotics-Half Length

Myfootshop Casual Carbon Fiber Orthotics-Half Length, reduce inward rolling (pronation) and relieve heel pain, arch pain, knee pain and back pain. The fully cushioned insole enhances comfort from the heel to the ball of the foot, relieving foot and ankle pain. Constructed from a semi-rigid carbon graphite shell and soft vinyl foam top cover. Heel is posted to neutral for added arch stability.

1 pair/pkg. Posted or non-posted? Posting of the heel increases the stability of an orthotic but also increases the amount of space that the orthotic takes up in the shoe. If your intent is to wear this insert in a dress shoe, we advise you to not choose the posted option. If you plan to use the orthotic in a golf shoe, tennis shoe or boot, posting is an option that may help improve the function of the orthotic. For a full-length insert be sure to check out our Sport Carbon Fiber Foot Orthotic - Full Length. Indications - The Casual Carbon Foot Orthotics - Half Length are used in the treatment of arch pain, arthritis of the foot and ankle, cuboid syndrome, flatfeet, forefoot pain, heel pain, heel spur syndrome, peroneal tendonitis, plantar fasciitis, posterior tibial tendon dysfunction, pronation, shin splints, sinus tarsi syndrome and tarsal tunnel syndrome. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they best for casual, dress, sport or work? Are they soft, semi-rigid or rigid? On a scale of 1-5 (1 poor/5 best), we rate the Casual Carbon Fiber Orthotic - half length a '4' for dress shoes and a '5' for work boots or tennis shoes. Casual Carbon Fiber Orthotics are a semi-rigid carbon graphite orthotic. Be sure to check each of our other arch supports for additional information.

94. Myfootshop Sport Carbon Fiber Orthotics-Full Length

Looking for professional grade carbon graphite orthotics at a fraction of the cost of prescription orthotics? Sport Carbon Fiber Orthotics provide control of pronation and stabilize the foot with a professional grade semi-rigid, light weight carbon fiber shell. Your choice of posted or non-posted shell allows you to customize your inserts for you individual needs. Full Length Sport Carbon Fiber Orthotics are constructed from a semi-rigid carbon graphite shell (the carbon fiber is 1/2 length) and a vinyl foam top cover. Heel is aligned to neutral for added stability. 1 pair/pkg. Posted or non-posted? Posting of the heel increases the stability of an orthotic but also increases the amount of space that the orthotic takes up in the shoe. If your intent is to wear this insert in a dress shoe, we advise you to not choose the posted option. If you plan to use the orthotic in a golf shoe, tennis shoe or boot, posting is an option that may help improve the function of the orthotic. For those who prefer a thinner, 1/2-length insert be sure to check out our Casual Carbon Fiber 1/2-length Orthotic. Indications - Carbon Fiber Foot Orthotics - Full Length are used in the treatment of arch pain, arthritis of the foot and ankle, cuboid syndrome, flatfeet, forefoot pain, heel pain, heel spur syndrome, peroneal tendonitis, plantar fasciitis, posterior tibial tendon dysfunction, pronation, shin splints, sinus tarsi syndrome and tarsal tunnel syndrome. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they soft, semi-rigid or rigid? Are they best for casual, dress, sports or work? On a scale of 1-5 (1 poor/5 best), we rate the Carbon Fiber Foot Orthotic - Full Length a '2' for dress shoes and a '5' for laced shoes such as tennis shoes or work boots. Carbon Fiber Orthotics are semi-rigid carbon graphite orthotic. We recommend this arch support for all work and sports activities. Be sure to check each of our other arch supports for additional information.

97. Nail Injury Repair Kit for Runner's Nail

Our Nail Injury Repair Kit for Runner's Nail is an all-in-one remedy for runner's nail. Early treatment and appropriate follow through will reduce the onset of a fungal infection of the nail following injury. Directions: First, use the Naileezer Nail Drill to drill into the nail so it can drain. Bruising beneath the nail, or subungual hematoma, should be drained as soon as possible after injury. Second, soak the toe twice daily in the Pedi-boro Soaks for three days. Third, use the ClearZal BAC Antifungal twice daily until the nail grows out completely. If the nail becomes loose as it grows use the Benzoin tincture ampules and butterfly closures to keep the nail in place.

The kit includes everything you need for toe nail repair: Naileezer Nail Drill, Pedi-boro Soak Paks (Aluminum Acetate Astringent Solution) x 6, ClearZal BAC Antifungal Nail Solution, Benzoin Tincture x 4, Butterfly closures x 10. Indications - The Nail Injury Repair Kit for Runner's Nail is used in the treatment of subungual hematoma, runner's nail and toe nail injuries. Foot Care Tip! Be sure to keep a Nail Injury Repair Kit with your emergency kit. Always handy to have on-hand for a nail injury.

98. NailEase Ingrown Nail Treatment

NailEase Ingrown Nail Treatment helps you to avoid painful and costly ingrown nail surgery. Each NailEase Ingrown Nail Treatment kit includes a thin, spring-loaded, carbon graphite brace that is adhered with glue to the top of the nail. Once adhered to the nails, the brace applies continuous lifting pressure to nail edges as the nail grows, eliminating ingrown nails and toe nail pain. Each NailEase kit includes a brace, special adhesive, adhesive accelerator, application tool, Emery board and alcohol prep pad. NailEase Ingrown Nail Treatment is indicated for use on the great toe. Use on the lesser toes is possible, but efficacy of use on the lesser toes is limited due to the size of the lesser (smaller) toe nails. Be sure to watch our demonstration video (above) to see proper application of NailEase Ingrown Nail Treatment. Indications - The NailEase Ingrown Nail Treatment is used in the treatment of acute and chronic ingrown nails.

99. NAILeezer Nail Drill

The NAILeezer Nail Drill is a patented micro-drill used to painlessly treat runner's nail. Use the Naileezer Nail Drill promptly after a toe nail injury to reduce pressure and pain from bruising beneath the nail. Evacuation of bruising beneath a nail (subungual hematoma) helps to preserve the healthy nail and prevent post traumatic fungal nail infections. The drill has a patented mechanism that limits the depth the drill can penetrate the nail. This unique feature means you have complete control over how deep you drill. The drill tip is 1/8" across. Instructions included. 1/pkg. Indications - The NAILeezer Nail Drill is used to release bruising beneath a nail or subungual hematoma caused by runner's nail and contusions of the nail.

100. Natural Antifungal Lavender Tea Tree Bar Soap

Natural Lavender Tea Tree Bar Soap was create in the Myfootshop.com lab to specifically address skin problems of the foot. The antifungal and antibacterial properties of Natural Lavender Tea Tree Bar Soap address the unique environment within the shoe. Natural Lavender Tea Tree Bar Soap is safe and effective and uses tea tree oil and lavender oil as its active ingredients. Controls fungal infections of the skin and nails. Natural Lavender Tea Tree Bar Soap is safe enough to use on your entire body, and is a great all-over daily shower soap. Ingredients - saponified organic coconut oil, olive oil, palm kernel oil, palm oil, castor oil, cocoa butter, lavender and tea tree essential oil blend, organic rice oil, shea butter, rosemary oil extract as preservative, bentonite clay. Indications - Natural Lavender Tea Tree Bar Soap is used to control athlete's foot, dermatitis, dry skin, fungal infections of the nail, bacterial infections of the foot, onychomycosis, runner's nail, toe box dermatitis and toe nail injuries. Storage - All natural soaps have a shelf life of 6-12 months. At 12 months the scents will fade a bit and the color may fade, but the soaps and active ingredients are still viable. Should you choose to store your Natural Lavender Tea Tree Bar Soap, use a Ziploc bag for indefinite storage.

101. Natural Antifungal Lavender Tea Tree Foaming Soap

Natural Antifungal Lavender Tea Tree Foaming Soap is a powerful antifungal and antibacterial soap. Natural Lavender Tea Tree Foaming Soap is safe and effective for every day use. Tea tree and lavender oils act as active ingredients. Tea Tree and lavender essential oils have natural antibacterial, antiviral, antimicrobial, antiseptic and antifungal properties. There's no mess with the pump dispenser. Natural Lavender Tea Tree Foaming Soap is also a great every day soap. Use it also as a 'by-the-sink' antibacterial hand soap. Indications: Natural Antifungal Lavender Tea Tree Foaming Soap is used in the treatment of athlete's foot, dermatitis, dry skin, hyperhidrosis, onychomycosis, sweaty feet, toe nail fungus, toe nail injuries including runner's nail and toe box dermatitis.

Additional indications include jock itch, diaper rash and fungal infections in skin folds such as under the breast or in fat folds. Foot Care Tip! Fungal infections of the skin and nail cannot be cured and need to be managed on a daily basis. Some simple tips include keeping your feet cool and dry. Rotate shoes to allow them to dry thoroughly and use socks every time you wear enclosed shoes.

Open shoes such as sandals help to keep feet open to UV light and fresh air. Get in the habit of using an antifungal soap and antifungal lotion on a daily basis.

102. Natural Antifungal Nail Butter

Natural Antifungal Nail Butter uses all natural ingredients to fight onychomycosis (fungal nails). Urea, a naturally occurring organic compound, debrides thick nails that have become infected and discolored with fungus. Natural Antifungal Nail Butter also contains lavender and tea tree oil to fight yeast, bacterial, and fungal infections of the nail. Use in conjunction with a nail cutter or nail file to remove loose nail tissue. Each packet of Natural Antifungal Nail Butter contains approximately enough product to treat one great toe nail for 30 days. Contains no artificial preservatives, coloring or perfumes. Net weight .3 oz for 3 tubes. Instructions for use: Clean the nail with soap and water, dry, and apply a liberal coating of Natural Antifungal Nail Butter. Do not cover with a bandage or Band-Aid. Covering the nail retains moisture and promotes growth of fungus. Repeat again for a total two applications each day.

Debride diseased nail once a week with a nail cutter, pumice stone, or nail file. Indications for Natural Antifungal Nail Butter: Use to treat fungal and yeast infections of the toe nails and finger nails, traumatic injuries of nails and thickening of nails due to injury. *Important* The degree to which the nail is infected or injured will dictate the duration of treatment. Small superficial areas of fungus may take a matter of weeks to treat. Advanced fungal infections or nail injuries may take 8-12 months to treat. It is important to continue to use Natural Antifungal Nail Butter until the nail is completely free of fungal infection.

107. Natural Herbal Soaking Salts

Natural Herbal Soaking Salts are a combination of Dead Sea salts and Epsom, menthol crystals and a mix of aromatic herbs including lavender flowers, chamomile, comfrey, roses and orange peel. Natural Herbal Soaking Salts are used to treat superficial rashes, bacterial infections and fungal infection. With repeated use, Natural Herbal Soaking Salts dessicate (dry) the skin. Drying the skin helps to draw superficial drainage from skin infections enabling the skin to heal more quickly. We recommend using Natural Herbal Soaking Salts with Healing Cream to rehydrate the skin following soaks. Recommended for external use only. Net wt. 4 ounces. When mixed with water, each jar of Natual Herbal Soaking Salts makes up to 6 gallons of natural soaking solution. Contains no artificial preservatives, coloring or perfumes. Indications for Natural Herbal Soaking Salts includes minor rashes, jock itch, diaper rash, athlete's foot, eczema, atopic dermatitis and stasis dermatitis. Natural Herbal Soaking Salts may also be used to treat contact skin allergies such as poison ivy or poison oak. Indications: Soothes aches and pains, relieves itching and softens corns and calluses, dry skin, cracked feet while fighting fungal and bacterial infections.

109. Natural Lavender Tea Tree Lotion - 4 oz.

Do you have persistent peeling feet? Chronic dry skin that fails to respond to skin softeners typically is a low-grade fungal infection called trichophyton rubrum (t. rubrum). Natural Lavender Tea Tree Lotion soothes dry skin and treats fungal infections such as t. rubrum. Its therapeutic formula of tea tree oil and lavender oil penetrates the skin, delivering antibacterial and antifungal agents. The lotion absorbs quickly, preventing irritation, cracking and painful fissuring. Doctor-recommended for diabetics. Works well on hands, too. Also available in 8-oz. size. Interested in a cream instead of a lotion? Try our Antifungal Healing Cream. Ingredients: Organic aloe juice, organic coconut oil, emulsifying wax NF, kosher vegetable glycerin, witch hazel, Vitamin E, phenoxyethanol, palm stearic acid, jojoba oil, lecithin, xantahn gum, mannan, black willowbark extract, neem oil, rosemary oleoresin, tetrasodium EDTA, citric acid, lavender and tea tree essential oil blend. Indications - Natural Lavender Tea Tree Lotion is used in the treatment of athlete's foot, dermatitis, fungal infections of the nail, onychomycosis and toe box dermatitis. Foot Care Tip! Fungal infections aren't cured but managed. That means ongoing treatment is required to improve the appearance of skin and nails. Get in the habit of using a topical antifungal once or twice daily depending on need. Keep the feet cool, dry and open to the air when possible.

111. Natural Moisturizing Callus Butter

Natural Moisturizing Callus Butter was developed by our medical staff in response to the many requests of our customers for a more effective way to treat hard, heavy calluses. When a lotion is just not able to do the job, Moisturizing Callus Butter becomes the tool for the tough jobs. Moisturizing Callus Butter is all natural and contains cocoa butter, beeswax, peppermint, spearmint, rosemary, Vitamin E and organic sunflower and coconut oils. Natural Moisturizing Callus Butter contains no water or alcohol that can dry the skin. 1 oz. stick. 1/pkg. Instructions for use - Be sure the feet are clean and dry before use. Apply at least twice daily. For best results cover the feet with socks to maintain the soothing, moisturizing effect. Indications - Moisturizing Callus Butter is used in the treatment of cracked heels, heel fissures, heavy callus and forefoot fissures. Foot Care Tip! Moisturizing Foot Butter should be used with a mechanical debridement tool that can remove calluses. With tools like a Callus File, Pumice Stone or Safety Callus Trimmer you'll use less callus cream and save money.

112. Natural Soaking Salts

Natural Soaking Salts are a combination of Dead Sea salts and Epsom salts with a hint of menthol crystals. Natural Soaking Salts are used to treat superficial rashes, bacterial infections and fungal infection. With repeated use, Natural Soaking Salts dessicate (dry) the skin. Drying the skin helps to draw superficial drainage from skin infections enabling the skin to heal more quickly. We recommend using Natural Soaking Salts with Healing Cream to rehydrate the skin following soaks. Recommended for external use only. Net wt. 4 ounces. When mixed with water, each jar of Natural Soaking Salts makes up to 6 gallons of natural soaking solution. Contains no artificial preservatives, coloring or perfumes. Indications: Soothes aches and pains, relieves itching and softens corns and calluses.

Repairs cracked feet while fighting fungal infections, bacterial infections and foot odor. Additional indications include minor rashes, jock itch, diaper rash, eczema, atopic dermatitis and stasis dermatitis. Natural Soaking Salts may also be used to treat contact skin allergies such as poison ivy or poison oak.

116. Neuroma Pads - Mini Felt

Our Mini Neuroma Pads are a great choice when a full-sized metatarsal pad is just too big for your needs. The neuroma pad helps ease the painful entrapment of nerve tissue at the ball of the foot, generally causing pain, tingling or numbness in the adjacent toes. Adhesive-backed pads can be applied either to the inside of your shoe or directly to the bottom of your foot. Measurements: 1" by 1" by 1/4" thick. Indications: Neuroma Pads - Mini Felt are used in the treatment of forefoot pain, forefoot capsulitis, forefoot callus, Morton's neuroma, metatarsalgia, forefoot bursitis and metatarsal fractures. Foot Care Tip: Metatarsal pads come in all shapes, sizes, materials, densities and thicknesses. Be sure to check out our entire line of metatarsal pads for more alternatives.

120. Pedag COMFORT Supports

The Pedag COMFORT Supports take the guesswork out of accurate placement of a metatarsal pad. The Pedag COMFORT Supports' metatarsal pad works wonders for painful Morton's neuroma, metatarsalgia, bursitis and capsulitis. Just slip the supports in a pair of shoes and go. Pedag COMFORT Supports are 3/4-length supports are made of vegetable tanned leather. The T-form metatarsal pad is an anatomically designed pad that targets forefoot pain. Extra-soft heel padding adds more comfort. The insoles are so thin (just leather covered foam), that they can easily fit in dress shoes and loafers. This product has received the Seal of Acceptance from The American Podiatric Medical Association. Pedag COMFORT Supports are a German product and come in euro/metric sizes. Use our size conversion chart tab (above) to determine your size. If you are a half-size, we recommend the larger size. 1 pair/pkg. Pedag COMFORT Supports are part of a family of metatarsal pads at Myfootshop.com. If you have any questions regarding which met pad may be best for your needs, be sure to contact us for advice before purchasing. Indications - Pedag COMFORT Supports are a great general-purpose insert used in the treatment of forefoot bursitis, forefoot pain, forefoot capsulitis, Morton's neuroma, metatarsalgia and arch pain.

122. Pedag Relax Shoe Insoles

If you love comfortable shoes, you will love Pedag RELAX Shoe Insoles. The comfortable and anatomically shaped foot support stabilizes the heel and soothes tired feet. Pedag RELAX Shoe Insoles are highly flexible and elastic. The longitudinal arch support, metatarsal pad and heel cup relieve strained feet. Pedag RELAX Shoe Insoles are a great choice for people who suffer from flat feet and fallen arches. 1 pair/pkg. Indications - The Pedag RELAX Arch Support is used in the treatment of arch pain, bursitis, flatfeet, forefoot pain, metatarsalgia, Morton's neuroma and pronation. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they soft, semi-rigid or rigid? Are they best for casual, dress, sport or work? On a scale of 1-5 (1 poor/5 best), we rate the Pedag RELAX Shoe Insoles a '5' for dress shoes and a '5' for tennis shoes and boots. They are soft and flexible with a semi-rigid arch. We recommend this arch support for all activities. Be sure to check each of our other arch supports for additional information.

124. Pedag SPORT Inserts

The Pedag SPORT includes a semi-rigid, polypropylene foot bed that offers longitudinal arch support. The anatomically positioned metatarsal pad alleviates metatarsal and forefoot pain, while the heel cushion adds shock absorption, reducing heel pain. The innovative non-slip top cover is resistant to bacteria and fungus and offers high shock elasticity for impact activities. (Formerly known as Pedag Pro-active XCO). Also insulates against cold from the ground and is extremely tough and hard-wearing. Fits most shoes including work boot and athletic shoes. Hand-washable. The toe can be trimmed to fit with scissors. 1 pair/pkg. Indications - The Pedag Sport Insert is indicated in the treatment of heel pain, plantar fasciitis, heel spur syndrome, posterior tibial tendon dysfunction, flat feet, metatarsalgia, Morton's neuroma, forefoot pain, forefoot capsulitis, forefoot bursitis, arch pain and sesamoiditis.

127. Pedag T-Form Metatarsal Pads

Pedag T-Form Metatarsal Pads are adhesive-backed leather metatarsal pads that ease pain in the ball of the foot by relieving pressure on the forefoot. The pads work by increasing the surface area of the bottom of the foot and off-loading the ball of foot. Great for forefoot problems such as Morton's neuroma, metatarsalgia, bursitis, sesamoiditis, and capsulitis. The anatomically correct T shape helps spread metatarsal bones and retain their natural position. Use in shoes or with OTC arch supports or prescription orthotics. Made of the finest colorfast vegetable tanned leather. One pair/pkg. Measurements Small 1 3/4" wide x 2 1/2" long x 1/4" thick Med 2" wide x 2 3/4" long x 1/4" thick Large 2 1/4" wide x 3" long x 1/2" thick XL 2 1/2" wide x 3 1/4" long x 1/2" thick Indications - Pedag T-Form Metatarsal Pads are used in the treatment of forefoot bursitis, forefoot capsulitis, forefoot callus, forefoot pain, Freiberg's infraction, metatarsalgia and Morton's neuroma. Foot Care Tip! Pedag T-Form Metatarsal Pads are part of a family of metatarsal pads we offer at Myfootshop.com. Metatarsal pads differ in many ways including in their firmness, shape, size and thickness. Pedag T-Form Metatarsal Pads are "finished" leather pads. They are medium-sized, medium-firm and medium-thick. We recommend Pedag T-Form Metatarsal pads in dress shoes and loafers where the pad can be placed in the inner lining of the shoe.

128. Pedag Viva Full Length Arch Supports

The Pedag Viva Full Length Arch Support features a semi-rigid longitudinal arch and plantar vault, a built-in orthopedic insert for the latitudinal arch (metatarsal) and a substantial heel cushion. The arch design relieves flatfeet by correctly aligning the foot and taking pressure off the ball and arch of the foot, while the heel pad relieves pressure and impact shock on the heel, ankle, knees and spine. The Pedag Viva Full Length Arch Support is thin enough to fit in most shoes. Its' breathable natural leather, tanned with herbal extracts, preserves a healthy climate inside the shoe or boot while its active carbon filter helps prevent foot odor. The Pedag VIVA Full Length Arch Support comes in euro/metric sizes. Please use our U.S. Pedag sizing chart to determine your size. If you are a half-size we recommend the larger size. 1 pair/pkg. Indications - The Pedag VIVA Arch Support is used in the treatment of arch pain, bursitis, callus, capsulitis, flatfeet, forefoot pain, Freibergs infraction, metatarsalgia, Morton's neuroma and pronation. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they soft, semi-rigid or rigid? Are they best for casual, dress, sport or work? The Pedag Viva Full Length Arch Support is a semi-rigid arch support. On a scale of 1-5 (1 poor/5 best), we rate the Pedag VIVA Full Length Arch Support a '3' for dress shoes and a '5' for tennis shoes and work boots. We recommend this arch support for all activities. Be sure to check each of our other arch supports for additional information.

129. Pedag VIVA MINI Arch Support

The Pedag Viva Mini is an excellent arch support for shoes such as flats, low heels, oxfords and sandals that don't have a lot of room. The insole relieves arch pain, metatarsal pain and forefoot pain with its semi-rigid plastic molded arch and soft removable metatarsal pad. It also features a soft cushioned heel cup. The arch support has a piece of adhesive under the heel to keep the support in place. This product has obtained the Seal Of Acceptance from the American Podiatric Medical Association. (formerly known as the Pedag Holiday Arch Support)

The Pedag VIVA MINI Arch Support comes in euro/metric sizes. Please use our U.S. Pedag sizing chart to determine your size. If you are a half-size we recommend the larger size. 1 pair/pkg. Indications - The Pedag VIVA MINI Arch Support is used in the treatment of arch pain, forefoot bursitis, forefoot callus, forefoot capsulitis, flatfeet, forefoot pain, Freiberg's infraction, metatarsalgia, Morton's neuroma and pronation. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they soft, semi-rigid or rigid? Are they best for casual, dress, sport or work? On a scale of 1-5 (1 poor/5 best), we rate the Pedag HOLIDAY/VIVA MINI Arch Support a '5' for dress shoes. They are semi-rigid. We recommend this arch support for all activities. Be sure to check each of our other arch supports for additional information.

130. Pedag VIVA SUMMER Insoles

The Pedag VIVA SUMMER (formerly SPORT) Insole's sisal fiber bed and terry cloth top wick away moisture, preventing fungal infections and foot odor. Supportive arch and metatarsal pad provide support for long hours of standing or recreational activities. A favorite among barefooters and those who don't like wearing socks in the summer. Recommended by the American Podiatric Medical Association.

Pedag VIVA SUMMER Insoles come in euro/metric Sizes. Please see our U.S. Pedag sizing chart for your size. If you wear a half-size we recommend the higher size. 1 pair/pkg. Indications - Pedag VIVA SUMMER Insoles are light-weight, used primarily by those who like to go barefoot or need a bit of absorption in the shoe. The insoles are used to treat hyperhydrosis (perspiration), bromhydrosis (foot odor), mild arch pain, flat feet, stage 1 PTTD, forefoot pain, metatarsalgia, forefoot capsulitis, bursitis and Morton's neuroma. Foot Care Tip! When shopping for arch supports ask yourself these questions: Will they fit into dress shoes? Are they soft, semi-rigid or rigid? Are they best for casual, dress, sport or work? On a scale of 1-5 (1 poor/5 best), we rate the Pedag VIVA SUMMER Insole a '3' for dress shoes. They are semi-rigid and great for dress, sports or work. We recommend this arch support for all activities especially when you're interested in 'bare foot'n. Be sure to check each of our other arch supports for additional information.

134. Post-Op Shoe

The semi-flexible Post-op Shoe conforms to the foot throughout the gait cycle, reducing stress on surgical and fracture sites. Constructed like a running shoe with excellent shock absorption and soft nylon upper allowing for air circulation, keeping the foot cooler. Walking is easier and more comfortable. Universal right/left. 1/pkg.

Please choose a size that is equal to or larger than your normal size. Post-Op Shoes are better too long rather than too short. Indications - Post-Op Shoes most commonly are used to accommodate bandages after foot surgery. They also may be used in the management of broken toes, metatarsal fractures, foot and ankle sprains and in the treatment of diabetic ulcers.

Price: 14.95 USD

SKU: 781

Weight: 18.00 ounce(s)

135. Premium Heel Wedges

Premium Heel Wedges align heels in shoes, reducing shoe heel wear, stabilizing heels and alleviating sore heels. Place the wedges in shoes to correct pronation or supination and to straighten the position of heels, easing heel pain. Use adhesive (not supplied) to keep the wedges in place, or slip the wedges beneath shoe insoles. The wedges conform to the shape of shoe heel counters and are intended for enclosed shoes. Made of firm natural rubber beveled to a slant with a tan leather top cover. Right and left are marked to be used in the medial aspect of the heel, but the wedges may be reversed to be used on the lateral side. Although sizes may vary we recommend the following: Small for women's sizes 5-6, men's sizes 8-9, Medium for women's size 7, men's size 10, Large for women's sizes 8+, men's sizes 11+. Indications - Premium Heel Wedges are used in the treatment of pronation, supination and poor heel alignment.

137. Reusable Gel Arch Pads

Reusable Gel Arch Pads support the arch, reducing pronation and arch pain. Reusable Gel Arch Pads adhere directly to the foot, alleviating pain caused by fallen arches, weak arches, flatfeet and pronation-related foot problems. The best thing about Reusable Gel Arch Pads is that the adhesive does not wear out after one use. The adhesive is reactivated every time the pads are hand-washed in mild soap and water. 2/pkg. Reusable Gel Arch Pads are Latex-free. Two thicknesses: 1/8 inch and 1/4 inch. We recommend starting with the 1/8-inch pad and moving to the thicker pad as necessary. Indications - Reusable Gel Arch Pads are used in the treatment of arch pain, flatfeet and pronation.

Price: 9.95 USD

SKU: 930

Weight: 6.00 ounce(s)

138. Reusable Gel Dancer's Pads

Reusable Gel Dancer's Pads provide fast relief for sesamoid and forefoot pain. The pads' pronounced cut-out is designed to shift weight away from the big toe joint or first metatarsal joint and sesamoids, relieving pain in the ball of the foot. The best thing about Reusable Gel Dancer's Pads is that the 'sticky' does not wear out after one use. The adhesive side of these dancer pads is reactivated every time you hand wash the pads with mild soap and water and let them dry. Great for dress shoes or sandals when an insert can't be worn. Effective in all shoes or even with just socks around the house. Made of latex-free silastic gel. Each package contains two pads: two rights or two lefts. Regular is 1/8 inch. Thick is 1/4 inch. Reusable Gel Dancer's pads are part of a family of metatarsal pads we carry at Myfootshop.com. 2/pkg. Indications - Reusable Gel Dancer's Pads are used in the treatment of sesamoiditis, sesamoid fractures, hallux limitus, turf toe, forefoot pain, Freiberg's infraction, forefoot capsulitis, forefoot bursitis, metatarsalgia and Morton's neuroma. Reverse the position of a Reusable Gel Dancer's Pad and use it to treat tailor's bunions and sub 5th metatarsal pain. Foot Care Tip! Dancer's Pads are primarily used to treat problems of the great toe joint - a left Dancer's Pad would treat the left great toe joint. But Dancer's Pads may also be used though to treat painful calluses beneath the 5th metatarsal head (behind the little toe). To treat a painful callus beneath the 5th metatarsal head on the left foot, you would order a right Dancer's Pad.

139. Reusable Gel Heel Cushions

Our Reusable Gel Heel Cushions are great for heel shock absorption and pressure relief. The soft cushions are made of low durometer, high performance polyurethane silicone gel. The bottom is adhesive-backed, providing the option of sticking the pad to the shoe. The top has a silver antimicrobial surface that fights bacterial and fungal infections. Fits all shoes including dress shoes and heels. 1 pair/pkg. May be trimmed with scissors. Two sizes: Men's - 4" long, 2 1/2" wide and 1/4" thick. Women's - 3 1/2" Long, 2 1/4" wide and 1/4" thick. Indications - Gel Heel Cushions are used in the treatment of generalized heel pain, Baxter's nerve entrapment and fat pad atrophy. For plantar fasciitis, heel spur syndrome, Achilles tendonitis or Sever's Disease a thicker, firmer heel lift or heel cushion will be more effective.

Price: 9.95 USD

SKU: 855

Weight: 3.00 ounce(s)

140. Reusable Gel Metatarsal Pad

Reusable Gel Metatarsal Pads provide fast relief for forefoot pain. You can use the pads two different ways: Wear Reusable Gel Metatarsal Pads directly over the ball of the foot to cushion fat pad atrophy, ball-of-foot pain, burning pain in feet and as a foot callus treatment. The thinner, 1/8-inch pads work best this way. Place Reusable Gel Metatarsal Pads immediately proximal to the ball of the foot to off-load weight away from the forefoot, reducing symptoms associated with Morton's neuroma, metatarsalgia, sesamoiditis and bursitis. Use the thicker, 1/4" pad for this method (refer to our demonstration video for proper pad placement). The best thing about Reusable Gel Metatarsal Pads is that the "sticky" doesn't wear out after one use. The adhesive is reactivated every time the pads are hand-washed in mild soap and water and is effective for months on end. Easily fits in all shoes. Great for dress shoes, sandals or just around the house in your socks. Reusable Gel Metatarsal Pads are made of latex-free silastic gel. Measurement: 2 3/4 inches long and 2 1/2 inches wide for both the 1/8" and 1/4" thicknesses.

Reusable Gel Metatarsal Pads are part of a family of metatarsal pads at Myfootshop.com. If you have any questions about which pad is right for you be sure to contact us prior to purchasing. Indications - Reusable Gel Metatarsal Pads are used in the treatment of forefoot bursitis, forefoot callus, forefoot capsulitis, forefoot pain, Freiberg's infraction, metatarsalgia and Morton's neuroma.

Price: 12.95 USD

SKU: 929

Weight: 7.00 ounce(s)

141. Reusable Gel Oval Callus Cushions

Reusable Gel Callus Cushions are an easy to use callus cushion for everyday use. Simple to place. Won't slip. The cushions adhere right to the foot, easing callus pain and tenderness caused by tailor's bunions, saddle bone deformities, dropped metatarsal heads and pump bumps on the backs of heels. Use the smaller bonus pad on sore spots where shoes rub. The best thing about these pads is that the adhesive does not wear out after one use. The adhesive is reactivated every time the pads are hand-washed in mild soap and water. Non-medicated and Latex-free. Indications - Reusable Gel Callus Cushions are used in the treatment of forefoot callus, forefoot pain, Haglund's deformities, saddle bone deformities, bunions and metatarsalgia.

Price: 9.95 USD

SKU: 931

Weight: 4.00 ounce(s)

Stock quantity: 0

142. Reusable Gel U-Shaped Callus Pads

The U-shaped gel cushion surrounds sore calluses and reduces pain by transferring pressure from the callus to the cushion. Position the pad so that the opening is comfortably placed around the sore spot, then remove the adhesive backing and adhere right to your foot. After each use, simply peel the pad off of your foot and replace the adhesive backing for safe-keeping. Had washable in mild soapy water. Rinse and air dry thoroughly. Once dry, the pad will renew its self-adhering surgace and stick to your foot many more times. One pair/pkg. Dimensions: 2" wide x 2 1/8" long x 1/8" thick. Indications: Reusable Gel U-Shaped Callus Pads are used in the treatment of forefoot pain, forefoot bursitis, forefoot capsulitis, metatarsalgia and Freiberg's Disease. Reusable U-Shaped Gel Pads are also used for Haglund's deformity, saddle bone deformities and to off-load ulcers and wounds of the lateral ankle.

143. Safety Corn and Callus Trimmer

The Safety Corn and Callus Trimmer shaves away corns and calluses safely, easily and painlessly. The trimmer is angled for precise removal of dry, hardened skin around toes and on heels and bottoms of feet. Works best on broad, flat calluses. Use caution with this or any product for patients with diabetes or poor circulation. 1/pkg. Indications - The Safety Corn and Callus Trimmer is used in the care and treatment of heel fissures, corns and calluses and warts. Foot Care Tip! Successful callus or corn removal requires ongoing care. It's best to get in the habit of trimming calluses once a week after a bath or shower when the skin is soft. A softening agent like ClearZal Callus Cream, Moisturizing Heel Butter or Ureacin-20 also helps soften calluses, making trimming quicker, safer and more comfortable.

145. Soaking Salts

Natural Soaking Salts are a combination of Dead Sea salts and Epsom salts with a hint of menthol crystals. Natural Soaking Salts are used to treat superficial rashes, bacterial infections and fungal infection. With repeated use, Natural Soaking Salts dessicate (dry) the skin. Drying the skin helps to draw superficial drainage from skin infections enabling the skin to heal more quickly. We recommend using Natural Soaking Salts with Healing Cream to rehydrate the skin following soaks. Recommended for external use only. Net wt. 4 ounces. When mixed with water, each jar of Natual Soaking Salts makes up to 6 gallons of natural soaking solution. contains no artificial preservatives, coloring or perfumes. Indications for Natural Soaking Salts includes minor rashes, jock itch, diaper rash, athlete's foot, eczema, atopic dermatitis and stasis dermatitis. Natural Soaking Salts may also be used to treat contact skin allergies such as poison ivy or poison oak. Net weight 4 oz. Indications: Soothes aches and pains, relieves itching and softens corns and calluses and cracked feet while fighting fungal infections, bacterial infections and foot odor.

146. Soft Corn Pads

Soft Corn Pads cushion toes protecting against rubbing and friction between toes. Soft Corn Pads are a staple of podiatry offices. Soft Corn Pads serve as a toe cushion used for soft corns between toes and to ease painful toes after toe fractures. The pads are 1/4-inch thick and typically are used between the lesser toes. Washable and reusable. Contains latex. Universal right/left. 6/pkg. Indications - Soft Corn Pads are used in the care and treatment of interdigital corns, Lister corns, hammer toes, claw toes, mallet toes and fractured toes.

SKU: 686

Weight: 4.00 ounce(s)

Stock quantity: 7

147. Spring Plate - Carbon/Graphite Fiber Insole

The Spring Plate - Carbon Graphite Fiber Insole relieves forefoot pain and arch pain. Its unique rocker sole provides a small toe spring, enabling roll-off at the forefoot. Sold individually right or left (not a pair). Because the Spring Plate - Carbon/Graphite Fiber Insert is very rigid and does not have a soft top cover, we suggest wearing it beneath insoles - either your shoes' existing insoles or over-the-counter insoles such as the Pedag SOFT Shoe Insoles. Spring Plate - Carbon/Graphite Fiber Inserts are NOT heat moldable. Do not modify the Spring Plate - Carbon/Graphite Fiber Insert on a grinder without respiratory protection. Grinding Carbon/Graphite will create extremely small carbon graphite particles that may be hazardous to your health. Sizing: We strongly suggest that you use length rather than shoe size as the determining factor in deciding what size plate to purchase. The best method is to take an insole out of a shoe you wear regularly and measure it from the back of the heel to the tip of the toe. Then choose a plate that is slightly shorter than your insert, so that it can be placed underneath the insole of your shoe. If you wear a half-size we recommend the smaller size of Spring Plate. Dimensions: Medium width only. 1/16" thick. See individual sizes for length. Availability and Shipping: Turn around time to ship Spring Plates may be longer than most of our products due to supplier availability of this product. Spring Plates usually ship within 7-10 days of placing your order. Spring Plates do qualify for free shipping and will be shipped by USPS First Class Mail. Indications: The primary benefit of the Spring Plate - Carbon/Graphite Fiber Insert is their rigidity and toe spring. Spring Plate - Carbon/Graphite Fiber Inserts act as a shank and are used to stiffen the shoe. Spring Plate - Carbon Graphite Fiber Insert are used to treat forefoot pain, forefoot capsulitis, forefoot bursitis, metatarsalgia, forefoot callus, Morton's neuroma, Freiberg's infraction, arch pain, metatarsal fractures, cuboid syndrome and arthritis of the forefoot and midfoot. Foot Care Tip! What are the differences among carbon/graphite fiber inserts sold on Myfootshop.com? Spring Plates are ultra-thin, full-length arch supports. A toe spring creates a forefoot rocker, off-loading forefoot pain. Molded Turf Toe Plates are thin, unfinished 3/4-length, carbon graphite arch supports with an arch and rigid Morton's extension. They're best suited for problems in and around the great toe joint including hallux limitus and hallux rigidus. Molded Turf Toe Plates come in multiple sizes. Flat Turf Toe Plates are similar to the Molded Turf Toe Plates but are flat and smaller, intended to fit in more types of shoes. Flat turf toe plates come in one size only. Hallux Trainer Inserts are a full length finished carbon graphite insert with Morton's extension that have the same indications as turf toe plates. Flat Carbon Fiber Plates contain no arch support or toe spring. They're recommended for metatarsal fractures and midfoot arthritis. Flat Carbon Fiber Plates are also used as an impenetrable plate to protect against puncture wounds of the foot. Myfootshop Carbon Fiber Foot Orthotics are a traditional full length or 1/2 length finished carbon graphite orthotic that may be used for sports, work or everyday use. Disclaimer: Shoes designs (called the shoe last) vary so that matching insoles and shoes is never a precise science. Placing a rigid insert (Spring Plate, Molded Turf Toe Plate, Flat Turf Toe Plate, Flat Carbon Fiber Plate) into your shoe may cause wear. The rigidity of these carbon fiber inserts may damage the softer cloth shoe last. Myfootshop.com is not responsible for any damage to your shoes that may be caused by use of these products.

148. Swede-O Ankle Lok Brace

The Swede-O Ankle Lok Brace is flexible yet supportive for multi-directional sports such as basketball, volleyball and football. Wear the Swede-O Ankle Lok Brace over socks in athletic shoes. Triple-layer vinyl laminate provides durability and comfort. Exclusive padded tongue option makes it easier to slip brace on and off. Optional side stabilizer inserts provide additional medial and lateral support. Full elastic backing allows unrestricted blood flow and prevents blistering. Closely spaced eyelets provide holding power and effective heel lock. Exclusive, patented offset panel for tight lacing. The Swede-O Ankle Lok Brace may be interlaced with the athletic shoe, making the shoe and brace, a dynamic ankle brace. Latex-free. 1/pkg. Ask about our sales team discounts for orders of 12 or more Swede-O Ankle Lok Braces. Choose small, medium and large. Universal right/left. Indications - The Swede-O Ankle Lok Brace is used in the care and treatment of chronic ankle instability and ankle sprains. The Swede-O Ankle Lok Brace is a great brace for multi-directional sports including football, basketball and volleyball. Foot Care Tip! When shopping for an ankle brace ask yourself this question: Am I looking for a brace that provides lateral ankle stability or compression to control swelling? On a scale of 1-5 (1 poor/5 best) we rate The Swede-O Ankle Lok Brace a '5+' for control of ankle instability and '4' for control of ankle swelling. We primarily recommend The Swede-O Ankle Lok Brace for athletes in competitive play who require aggressive stability. The Swede-O Ankle Lok Brace is a good choice for rehab after ankle sprains. Be sure to check each of our other ankle supports for additional information.

149. Tailor's Bunion Toe Spreader Combo Pad

The Tailor's Bunion Toe Spreader Combo Pad relieves bunionette (tailor's bunion) pain and pressure, little toe pain and prevents callus build-up on the outside of the 5th toe. The Tailor's Bunion Toe Spreader Combo Pad also helps to prevent soft corns between the 4th and 5th toes. The toe spreader helps align your fourth and fifth toes while spreading them apart. The 1/8-inch-thick soft gel pad fits easily into all shoes and adjusts itself to the contours of the fifth toe and joint. Durable and reusable. Hand wash in mild soapy water, air dry and refresh with talcum powder. Silicone material is oil-based, non-toxic and nonallergenic. Avoid direct contact with open wounds. Latex-free. Universal right/left. 1/pkg. Indications - The Gel Tailor's Bunion Protector is used in the treatment of tailor's bunion. Also helpful in the treatment of soft corns and lister corns.

150. Therafirm Compression Knee High Socks

Therafirm Compression Knee High Socks feature knee-high, lightly ribbed, graduated compression (15-20 mm/Hg) with non-binding tops. Gradient compression delivers distributed compression to the calf and ankle. The degree of compression gradually decreases from the ankle to the knee. Compression support hose is generally expressed in mmHg (millimeters of mercury) and has 4 levels of pressure. Therafirm Compression Knee High Stockings provide a mild, non-prescription grade 1 of compression, which is perfect for tired, aching feet and legs, mild swelling and mild varicosities. Choose from multiple men and women's sizes. Black only. 1 pair/pkg. Every pair of Therafirm Compression Knee High Socks includes comfort support stitching in the heel and toe. Made with Micro-Cool Lycra microfibers for a soft, cool, comfortable and stretchy sock. Anti-microbial agent wicks away moisture and prevents bacteria and fungus within the fiber, leaving the skin cleaner and healthier. Indications - Therafirm Compression Knee High Socks are used in the treatment of peripheral edema, swollen ankles and legs, varicose veins and venous stasis dermatitis and venous ulcers.

151. Tineacide Antifungal Cream

Toenail fungus? Tineacide is among our favorite topical treatments for fungal infections of the nails. Tineacide is a great mix of traditional and alternative antifungal medication potent enough for toenail fungus. Great for small, isolated fungal infections of the skin, too. 1-1.25 oz. bottle. Indications: Tineacide Antifungal Cream is used in the treatment of onychomycosis, fungal nail infections and yeast infections of the fingernail and toe nail. Foot Care Tip! The key to treating fungal infections of the skin and nails is not the amount of medication used, but rather the consistency with which you use it. Fungal infections of the nail can be particularly difficult to treat if you are not compliant with daily treatment for at least 3-5 months. Your fungal infection is not going to take a day off, so you can't either!

Price: 15.95 USD

SKU: 683

Weight: 6.00 ounce(s)

Stock quantity: 15

152. Tineacide Shoe Spray

Tineacide Shoe Spray helps to limit bacterial and fungal infection of the foot by disinfecting your shoes. Tineacide Shoe Spray destroys 99% of bacteria and fungus on contact. Used regularly, Tineacide Shoe Spray decreases the risk of fungal and bacterial re-infections. Tineacide Shoe Spray is remarkably effective in controlling shoe odor. Works equally well on nonporous and porous materials such as leather. Each bottle treats up to six pairs of shoes for six months. 2 fl. oz. bottle. Indications - Tineacide Shoe Spray is used in the treatment of hyperhidrosis (sweaty feet), bromhidrosis (smelly feet), athlete's foot, dermatophytosis (chronic fungal infections of the skin) and onychomycosis (fungal infections of the nails). Foot Care Tip! Tineacide Shoe Spray works great as part of a comprehensive treatment plan for fungal nail infections and athlete's foot. That comprehensive plan should include a topical antifungal, a foot antiperspirant and shoe disinfectant such as Tineacide Shoe Spray. Tineacide Shoe Spray can break the cycle of re-infection that is so common to recurrent fungal infections of the foot.

153. Toe Caps - Foam

Foam Toe Caps are a seamless toe protector that provide all-around comfort for toe joints and nails. Additional soft padding in the tip of the Foam Toe Cap reduces pressure, friction and irritation and soothes cuts and sores on painful toe tips. Foam Toe caps can be used to protect injuries to toe nails. Hand wash with warm water and soap. Effective for months. Made of polyfoam. Latex-free. Universal right/left. 2/pkg.

Although sizes may vary we recommend large for the big toe, medium for the middle toes and small for the small toe. These sizes are based on a woman's size 7 foot. Please adjust your size accordingly. Sizes: Small: 1 3/4" long x 1/2" inside diameter. Medium: 1 7/8" long x 5/8" inside diameter. Large: 2 1/4" long x 7/8" inside diameter. Indications - Foam Toe Caps are used in the care and treatment of hammer toes, mallet toes, claw toes, nail injuries and broken toes.

Price: 8.95 USD

SKU: 699

Weight: 4.00 ounce(s)

154. Toe Correctors - Foam

Toe Correctors buddy-splint toes together helping to limit range of motions and friction between toes. Toe Correctors help treat hammer toes and corns on the toes. Useful as a splint for broken toes and following hammer toe surgery. Made from soft foam, tricot and Velcro. Fully adjustable. Re-useable and hand-washable. Latex-free. One size fits all. Universal right/left. 2/pkg. Indications - Toe Correctors are used in the care and treatment of hammer toes, claw toes, mallet toes, toe nail injuries and broken toes.

Price: 5.95 USD

155. Toe Correctors - Gel

Our Gel Toe Corrector acts like a toe splint, keeping 2 toes aligned. The Gel Toe Corrector is made of silicone gel and easily stretches over your toes to correct alignment. Relieves irritation between toes straightens crooked toes. Hand washable in warm soapy water. Make sure they are completely dry before reusing them. Universal right/left. 2/pkg. Choose from sizes Small, Medium, and Large. We recommend small for lesser toes and large when treating the great toe and second toe. Indications: The Gel Toe Corrector is used in the care and treatment of hammer toes, claw toes, mallet toes and broken toes. Also a great splint for overlapping toes.

Price: 10.95 USD

SKU: 967

Weight: 3.00 ounce(s)

156. Toe Cushions

Toe Cushions relieve pressure and friction between sore toes. Toe Cushions (also called toe combs), separate and align irritated or crooked toes, protect sensitive areas, support hammer toes and ease pressure on sore corns and calluses. Toe Cushions also keep interdigital spaces dry, inhibiting fungus growth. Comfortable in most shoes. Wash in mild detergent. Latex-free. Universal right/left. One size. 2/pkg. Indications - Toe Cushions are used in the treatment of corns and calluses, hammer toes, claw toes, mallet toes and broken toes.

157. Toe Separator - Large/Firm

Toe Separators are a staple of podiatry and orthopedics offices. Our 1/2-inch-wide Large Firm Toe Separators can be used between the first and second toes to cushion toes and control great toe pain, bunion pain and drift of the big toe. The pads also can maintain big toe correction after bunion surgery and address hammer toe pain and soft corns between toes. Washable and reusable. Contains latex. Universal right/left. 4/pkg. Please note this is a very firm pad used primarily to position the great toe. For a softer pad please try our soft gel Bunion Spacer or for smaller foam pads see our Soft Corn Pads. Indications - Our Large, Firm Toe Separator is used to align the great toe in cases of a bunion. These pads also are great to maintain alignment of the great toe after bunion surgery.

Price: 5.95 USD

SKU: 693

Weight: 4.00 ounce(s)

Stock quantity: 13

158. Toe Separators - Gel

Gel Toe Separators are made of silicone gel impregnated with mineral oil to cushion toes. Use Gel Toe Separators to relieve rubbing, pinching, cramping and soft corns between toes. The mineral oil in the Gel Toe Separator softens lumps and bumps, soothing pain between toes. Great for crooked or overlapping toes or as a foot corn treatment. The silicone gel in the Gel Toe Separator lasts much longer than similar pads made of felt or foam. Hand wash with soap and warm water. Sizes: Small/Medium: 1/8" thick x 1 1/2" long x 3/4" wide Large/XLarge: 1/8" thick x 2" long x 13/16" wide Although sizing may vary, we recommend small/medium for problems between the lesser toes and large/x-large for problems between the first and second toes. Latex-free. Universal right/left. 3/pkg. Indications - Toe separators are used in the care and treatment of hammer toes, claw toes, mallet toes, toe nail injuries and fractured toes. These pads also work great as a splint after hammer toe surgery.

Price: 4.95 USD

SKU: 696

Weight: 4.00 ounce(s)

159. Toe Separators 3-Layered

3 Layered Toe Separators consist of three layers - the center layer is firm and the outside layers are soft. 3-Layered Toe Separators support toes in their normal position, absorb friction and pressure between adjacent or overlapping toes and relieve rubbing, cramping, pinching, between-toe corns and pain between toes. Great for cushioning calluses between toes. Hand wash with warm water and soap. Universal right/left. 3/pkg. We recommend the large size between the big toe and second toes, medium between the lesser toes and small between the fourth and fifth toes, although foot sizes vary. Sorry, we can't mix sizes. Latex-free. Indications - 3-Layered Toe Separators are used in the treatment of interdigital corns including soft corns and Lister corns. Also used to realign bunions.

Price: 4.95 USD

SKU: 827

Weight: 2.00 ounce(s)

160. Toe Sleeves - Gel

Gel Toe Sleeves wrap toes in soft silicone rubber, alleviating pressure on toes from shoes and adjacent toes. Great for toe calluses and toe pain in hard-to-reach places such as in between toes and where other pads won't stay in place. Easy to slip on and off. Thin yet extremely durable. Wash with soap and water. Latex-free. Universal right/left. 4/pkg. We recommend large for the great toe and small for the lesser toes. Small measures 1 1/2 inches around, Large measures 2 1/4 inches around. Indications - Gel Toe Sleeves are used in the treatment of toe deformities such as hammer toes, mallet toes and claw toes. The pads also are used in the treatment of soft corns between toes and Lister corns and hard corns on top of toes. Use the pads to protect the great toe nail from trauma or runner's nail.

Price: 12.95 USD

SKU: 854

Weight: 3.00 ounce(s)

161. Toe Spacer-Bunion Guard Combo

The Toe Spacer-Bunion Guard Combo separates and aligns first and second toes while the contoured bunion guard cushions bunions and protects them from rubbing in shoes. The Toe Spacer-Bunion Guard is made of medical-grade silicone rubber and infused with mineral oil and Vitamin E to soften corns and calluses and keep skin healthy. Pads made of silicone gel last longer than similar pads made of felt or foam. Hand wash in warm soapy water. Latex-free. One size fits most. Universal right/left. 1/pkg.

Indications - The Toe Spacer-Bunion Guard Combo is used in the treatment of bunions and hallux limitus.

162. Toe Straightener - Double Toe

Double-Toe Toe Straighteners, often called Budin Splints, guide toes into proper alignment. Toe Straighteners align overlapping toes and crooked toes. Toe Straighteners prevent rigid hammer toes by encouraging flexing and extension. Ideal as a post-op splint after toe surgery. Trim with scissors. Clean with soap and warm water. Latex-free. One size fits all. Universal right/left.

1/pkg. Indications - Toe Straighteners are used in the care and treatment of hammer toes, claw toes, mallet toes, painful corns on toes, poorly aligned fractures of toes and as a splint after hammer toe surgery.

Price: 8.95 USD

SKU: 707

Weight: 4.00 ounce(s)

Stock quantity: 0

163. Toe Straightener - Single Toe

Single-Toe Toe Straighteners, often called Budin Splints, guide toes into proper alignment. Toe Straighteners position crooked or overlapping toes. Toe Straighteners are also recommended for hammer toe correction. If your hammer toe is flexible, the toe band can pull your toe down and keep it in a straight, corrected position. The straighteners prevent rigid hammer toes by encouraging flexing and extension. Ideal as a post-op splint after toe surgery. Universal right/left. 1/pkg. The cotton-covered elastic loop is adjustable and holds your toe securely and snugly in place, while the soft foam pad molds itself to the bottom of your foot. Trim with scissors. Hand clean with soap and warm water. Allow to dry completely before use. Indications - Toe Straighteners are used in the care and treatment of hammer toes, claw toes, mallet toes, painful corns on toes, poorly aligned fractures of toes and as a splint after hammer toe surgery.

Price: 8.95 USD

SKU: 706

Weight: 4.00 ounce(s)

164. Tongue Pads - Felt

Felt Tongue Pads tighten loose-fitting shoes. Tongue Pads push the heel into the heel seat, tightening shoe fit. Great for helping narrow feet fit into medium sized shoes. Tongue pads are also used to prevent damage to toes nails. The pads are adhesive-backed and work in all enclosed shoes. More than one pad might be needed for proper fitting. Pads measure 3 inches by 1 3/4 inches by 1/8 inch. Latex-free. 4/pkg. Indications - Felt Tongue Pads are used to modify loose shoes, shoes that are too wide and shoes that slip on the heels. Also can be used to protect prominent areas and problems such as saddle bone deformities, Haglund's deformities and tailor's bunions. Also used to prevent injuries to toe nails including runner's nail. Foot Care Tip! Split tongue pads are the conservative treatment of choice for saddle bone deformities and entrapment of the deep peroneal nerve. Be sure to follow the link to saddle bone deformities to see images of how to use a split tongue pad to treat this condition.

165. Triple-Stall Tubular Foam Toe Bandage

Triple-Stall Tubular Foam Toe Bandages separate and cushion toes that rub and become irritated. Triple-Stall Tubular Foam Toe Bandages buddy-splint toes, stabilizing hammer toes, overlapping toes and painful injuries such as broken toes. Triple-Stall Tubular Foam Toe Bandages also relieve pressure and friction that cause corns, calluses, blisters on toes, bunions, crooked toes, ingrown nails and other toe irritations. Use Triple-Stall Tubular Foam Toe Bandages as a splint after hammer toe surgery. Cut and shape with scissors to make toe and nail protectors, bunion shields and more. Triple-Stall Tubular Foam Toe Bandages are intended for use on the lesser toes. Great for fingers, too. Compress for proper shoe fit. Hand wash with warm, soapy water. Latex-free. Choose between one 5" piece or four 1" pieces. Indications: Triple-Stall Tubular Foam Toe Bandages are used in the treatment of claw toes, hammer toes, mallet toes, corns of the toes, broken toes and following hammer toe surgery.

Price: 6.95 USD

SKU: 889

Weight: 2.00 ounce(s)

Stock quantity: 4

166. Tubular Foam Toe Bandages

Tubular Foam Toe Bandages relieve discomfort from corns, calluses, blisters, bunions, crooked toes, ingrown nails, mucoid cysts, toe nail pain and other toe irritations. Fabric-lined interior. Cut and shape with scissors to make toe and nail protectors, bunion shields and more. Great for fingers, too. Compress for proper shoe fit. Soft foam lasts for months.

Sizes: Although foot sizes vary we recommend large for the great toe, medium for the middle toes and small for the little toe. These sizes are based on a woman's size 7 foot. Please adjust your size accordingly. All sizes come in 2 lengths: 5" long, or 1" long. Small has a 5/8-inch interior diameter, Medium has a 3/4-inch interior diameter, Large has a 1-inch interior diameter. Sorry, we can't mix sizes. Clean with warm, soapy water. Latex-free. Indications - Tubular Foam Toe Bandages are used in the care and treatment of hammer toes, claw toes, mallet toes, nail injuries and fractured toes.

167. Turf Toe Plate - Carbon Graphite - Flat

Turf Toe Plates limit the range of motion in the great toe, relieving pain in the great toe joint. The Flat Carbon Graphite Turf Toe Plate provides a Morton's extension that extends under the big toe. The Flat Carbon Graphite Turf Toe Plate is designed to limit the range of motion of your big toe, while allowing your smaller toes free range of motion. The Flat Carbon Graphite Turf Toe Plate is an easy fit for dress shoes, tennis shoes and work boots. The Flat Carbon-Graphite Turf Toe Plate can be worn under the insert that comes with your shoe or used in conjunction with an over-the-counter shoe insole or Rx orthotic. The Flat Carbon-Graphite Turf Toe Plate is flat with no contoured arch. Universal right/left fit. One size fits all. Sold 1/pkg. Measurements: 8" long and 1/16" thick. Weighs approximately 1 oz. Placement: The key to good placement is to make sure the extension piece is underneath your big toe, regardless of where the back of the plate ends. We suggest using 2-sided tape to adhere the Flat Carbon Graphite Turf Toe Plate to the underside of your current orthotic or arch support. Indications: The Flat Carbon-Graphite Turf Toe Plate is used in the treatment of turf toe, hallux limitus, hallux rigidus, arthritis, and great toe fractures. Foot Care Tip! What are the differences among carbon graphite fiber insoles sold at Myfootshop.com? These four carbon fiber plates are best used to treat hallux limitus and hallux rigidus and turf toe. Flat Turf toe plates are thin, 3/4-length inserts that have a rigid Morton's extension and are completely flat. Molded Turf Toe Plates are thin, unfinished 3/4-length, carbon graphite arch supports with an arch and rigid Morton's extension. Hallux Trainers are full length finished insoles with a carbon graphite insert with semi-rigid Morton's extension. Carbon Spring Plates are ultra-thin, full-length arch supports with toe spring. Toe spring creates a forefoot rocker, off-loading forefoot pain. Additional carbon fiber inserts from Myfootshop.com-Flat Carbon Plates contain no arch support or toe spring. Flat carbon plates are recommended for metatarsal fractures and midfoot arthritis. Myfootshop Carbon Fiber Foot Orthotics are a traditional full length or 1/2 length finished carbon graphite orthotic that may be used for sports, work or everyday use.

Stock quantity: 6

168. Turf Toe Plates - Carbon Graphite - Molded

Turf Toe Plates are used to limit the range of motion in the great toe, relieving pain in the big toe joint. The extension under the great toe, called a Morton's extension, is designed to limit the range of motion of your big toe, while allowing your lesser toes free movement. The Turf Toe Plate is very thin yet very stiff, made of carbon fiber. Because the plates are very rigid we suggest wearing them beneath insoles; either the shoes' existing insoles or over-the-counter insoles such as Pedag SOFT Shoe Insoles. Sold individually Left or Right, not as a pair. Availability and Shipping: Turn around time to ship Turf Toe Plates may be longer than most of our products due to supplier availability of this product. Turf Toe Plates usually ship within 7-10 days of placing your order. *** Several Sizes of the Turf Toe Molded Plates are on backorder from our supplier. The merchandise is being shipped from Germany and we do not know the reason for the delay but hope to have all sizes available soon. If you would like to know if the size you need is available, please contact us. Thanks for your patience.***Sizing: We strongly suggest that you use length rather than shoe size as the determining factor in deciding what size plate to purchase. The best sizing method is to measure your foot on a piece of paper. Once the length of your foot is measured, choose a plate that is slightly shorter than your foot. The goal is to have the Morton's extension piece reach between the base of the toe nail and the tip of your big toe. For example, if your foot measures 10", the 39/40 (9 1/4") will fit perfectly. When your heel is in the heel cup, the arch hits in the right place and the Morton's extension reaches just short of the tip of your great toe. Dimensions: Medium width only, 1/8" thick. See individual sizes for length. Turf Toe Plates may be modified with a heat gun, but once modified cannot be returned for a refund or exchange. Indications - Turf toe plates are used in the treatment of hallux limitus, hallux rigidus, turf toe, gouty arthritis and rheumatoid arthritis of the great toe joint. Foot Care Tip! What are the differences between all of the carbon fiber/graphite plates sold at Myfootshop.com? These four carbon fiber inserts are best used for hallux limitus and hallux rigidus and turf toe. Molded Turf Toe Plates are thin, 3/4-length, carbon graphite arch supports, with a molded arch and Morton's extension. Flat Turf Toe Plates are similar to the molded plates, but are completely flat, with a Morton's extension. Flat Turf Toe Plates come in only one size. Hallux Trainer Inserts are a full length finished carbon graphite insert with Morton's extension that have the same indications as turf toe plates. Spring Plates are ultra-thin, full-length arch supports. A toe spring creates a forefoot rocker, off-loading forefoot pain. Spring Plates are indicated for metatarsal fractures, forefoot capsulitis, forefoot bursitis and Freiberg's infraction. Spring Plates may also be used to treat hallux limitus and hallux rigidus. Additional carbon fiber inserts - Flat carbon plates contain no arch support or toe spring. They're recommended for metatarsal fractures and midfoot arthritis. Myfootshop Carbon Fiber Foot Orthotics are a traditional full length or 1/2 length finished carbon/graphite orthotic that may be used for sport, work or everyday use. Disclaimer - Shoes designs (called the shoe last) vary so that matching insoles and shoes is never a precise science. Placing a rigid insert (Spring Plate, Molded Turf Toe Plate, Flat Turf Toe Plate, Flat Carbon Fiber Plate) into your shoe may cause wear. The rigidity of these carbon fiber inserts may damage the softer cloth shoe last. Myfootshop.com is not responsible for any damage to your shoes that may be caused by use of these products.

169. Turf Toe T-Strap

The Turf Toe T-Strap is a unique pre-cut moleskin strap that limits motion of the big toe joint, reducing big toe joint pain and inflammation. Great for athletes or those suffering from turf toe, hallux limitus or great toe pain. Turf toe is a term used in athletic circles to describe a jamming, impact or hyperextension injury of the big toe joint. Trainers, podiatrists and sports medicine specialists use the Turf Toe T-Strap during the acute phase of turf toe and big toe joint injuries to relieve pain in the big toe and keep players in the game. Adhesive-backed and latex-free. 5/pkg. For long term management of turf toe, hallux limitus and hallux rigidus, be sure to check out our Hallux Trainer, Carbon Fiber Spring Plate, Flat Carbon Turf Toe Plate or Molded Turf Toe Plate. Measures: Main strap is 7 3/4" long x 2" wide; Toe strap is 4" x 1" Indications - The Turf Toe T-Strap is used in the treatment of hallux limitus and turf toe.

170. UCBL Preform Children's Orthotic

The UCBL (also known as a Roberts) Preform Children's Orthotic supports pediatric flatfeet. Semi-rigid subortholene thermoplastic construction aggressively controls forefoot and rearfoot motion. The orthotics feature deep heel cups with high medial and lateral flanges. 1 pair/pkg. Indications - UCBL Heel Stabilizer Preform Children's orthotics are used in the treatment of pediatric flatfoot and pronation in children. Foot Care Tip! Wondering what orthotic is right for your child? We offer two styles of pediatric arch supports: the Whitman Orthotics and the UCBL Pediatric Orthotic. The Whitman is semi-rigid with a medium-height arch and lateral heel flange to limit eversion of the heel. This is a general-purpose pediatric support and our most popular pediatric orthotic. The UCBL offers more support. It has a deeper heel cup, higher lateral flange, more heel stabilization and requires more shoe room. We usually see patients use the UCBL between the ages of 18 months and 3 years and then switch to the Whitman. Patients with severe, painful flatfeet can use the UCBL beyond the age of 3. Occasionally we see adult patients with severe flatfeet use the UCBL.

171. Ultra Thin Ball of Foot Slip-on Strap

Ultra Thin Ball of Foot Slip-on Straps provide comfort and protection to the ball-of-foot area. They cushion the forefoot, metatarsal heads and ball of the foot. This slip-on gel pad is ideal for fat pad atrophy of the forefoot. The elastic sleeve fits comfortably over your forefoot, keeping the gel pad in place. They provide forefoot protection and shock absorption and reduce calluses in dress shoes, high heels, work boots, bicycle shoes and ballet shoes. One pair/package. One size fits most. Satin fabric over gel pad. Latex free. Washable and re-usable. Each cushion can be used over-and-over again. Indications - Ultra Thin Ball Of Foot Slip-on Straps are used in the treatment of bursitis, callus, capsulitis, forefoot pain, Freiberg's infraction, metatarsalgia, Morton's neuroma and sesamoiditis. Also great to add padding to the forefoot in cases of fat pad atrophy.

172. Ureacin-20 Cream

Ureacin-20 Cream is one serious callus buster. Ureacin-20 Cream softens and moisturizes dry, severely callused feet. We recommend the cream for hard, thick, tough-to-treat calluses on the heels or forefeet. Works on hands too. Apply twice daily. Ingredients - water, urea 20%, TEA-stearate, mineral oil, PEG-2 stearate and PEG-2 stearate SE, glycerin, sodium borate, methylparaben, propylparaben, EDTA, lactic acid and diazolidinyl urea. Indications - Ureacin-20 Cream is used to treat thick heavy calluses such as cracked heels, heel fissures and forefoot calluses. Foot Care Tip! Ureacin-20 is a chemical debridement cream that uses a combination of acids to debride calluses. Chemical debridement creams like Ureacin-20 should be used with a mechanical debridement tool to remove the bulk of calluses. Using a tool like a Callus File, Pumice Stone or Safety Callus Trimmer will enable you to use less callus cream and save money over time.

173. VHD - Vasyli Howard Dananberg Insole

VHD-Vasyli Howard Dananberg Orthotics are designed for those patients with 1st ray dysfunction (1st metatarsal and great toe) that leads to hallux limitus. The VHD-Vasyli Howard Dananberg Orthotic allows the user to 'tune' the function of the 1st ray by using the proximal and distal plugs to raise or lower the first ray. The VHD-Vasyli Howard Dananberg Orthotic is indicated for stage 1-3 hallux limitus. For stage 4 hallux limitus (hallux rigidus), we recommend the use of a turf toe plate. The difference between the VHD-Vasyli Howard Dananberg Orthotic and the turf toe plate boils down to flexibility vs. rigidity – the VHD-Vasyli Howard Dananberg Orthotic is used to increase range of motion of the great toe joint while the turf toe plate acts to rigidly splint the joint, inhibiting motion. Be sure to consult our knowledge base article on hallux limitus for more information on staging of hallux limitus. VHD-Vasyli Howard Dananberg Orthotics are made of ethyl vinyl acetate (EVA), a microcellular foam. The top cover is brushed nylon. VHS-Vasyli Howard Dananberg Orthotics are heat moldable. Designed primarily for fit in athletic shoes or boots. The VHD-Vasyli Howard Dananberg Orthotic is also a great choice for those folks with a high arch and plantarflexed first ray. 1 pair/pkg. Indications: The VHD-Vasyli Howard Dananberg Orthotic is used in the treatment of hallux limitus, hallux rigidus, turf toe and bunion pain.

174. Walking Cast - Low Top Pneumatic

Get around comfortably in the Low Top Pneumatic Walking Cast. The low-top design makes walking and wearing pants easier. Wide base adds stability. Easy to adjust for desired compression and fit. Pneumatic bladder can be regulated to control swelling of the ankle and lower leg. Three sizes to choose from. Universal right/left. We also offer a High Top Pneumatic Walking Cast and Economy Walking Cast. Indications - The Low Top Pneumatic Walking Cast is used as an alternative to the High Top Pneumatic Walking Cast when immobilization of the leg is not required for healing. The air cast is used in the treatment of metatarsal stress fractures, peroneal tendonitis, peroneal tendon ruptures, peroneal tendon subluxation, ankle sprains and diabetic foot ulcerations.

175. Walking Cast - High Top Pneumatic

The High Top Pneumatic Walking Cast increases stability and decreases pain and swelling while recovering from an injury or surgery. It's easy to adjust the walking cast for the best compression and fit. The pneumatic bladder can be regulated to control swelling of the ankle and lower leg. Rocker bottom sole off-loads the foot, relieving pressure on fractures and injuries. Non-skid sole offers greater stability in wet conditions. Three sizes. Latex-free. Universal right/left. We also offer a Low Top Pneumatic Walking Cast and a non-pneumatic Economy Walking Cast.

Indications - The High Top Pneumatic Walking Cast is used in the treatment of ankle fractures, metatarsal fractures, ankle sprains, high ankle sprains, peroneal tendonitis, peroneal tendon ruptures, peroneal tendon subluxation, calcaneal fractures, talar fractures, Achilles tendon ruptures and Achilles tendonitis.

176. Walking Cast , Economy- Cam Walker

The Economy Cam Walker Walking Cast is lightweight, sturdy and easy to use. The one-piece design is light and comfortable. The integrated strapping delivers full circumferential compression from the foot up the calf. Non-skid rocker sole and fiber leg wrap compress swollen ankles. Foam liner can be removed and washed by hand in warm soapy water. Latex-free. Three sizes. Universal right/left. If you are interested in a pneumatic compression cast, be sure to view our low-top and high-top compression casts.

Pneumatic compression casts are adjustable and are designed to provide a snug fit of the foot, ankle and leg. Indications - The Economy Cam Walker Walking Cast is used in the treatment of chronic ankle pain, ankle fractures, ankle sprains, peroneal tendon subluxations, peroneal tendon ruptures, peroneal tendonitis, acute and chronic Achilles tendonitis, partial Achilles tendon rupture, stress fractures, calcaneal fractures, cuboid syndrome and metatarsal fractures.
